Board of Retirement
Sacramento County Employees' Retirement System
980 9th Street, Suite 1900
Sacramento, CA 95814

Dear Board Members:

As Chief Executive Officer of the Sacramento County Employees' Retirement System (SCERS or the System), I am pleased to present this Comprehensive Annual Financial Report (CAFR or the Report) for the fiscal years ended June 30, 2018 and 2017.

The System

SCERS is a cost-sharing multiple-employer public employee retirement system, enacted and administered in accordance with the provisions of the County Employees Retirement Law of 1937 (California Government Code Section 31450, et seq.) (1937 Act) and the California Public Employees' Pension Reform Act of 2013 (PEPRA). Since its establishment by the Sacramento County Board of Supervisors in 1941, SCERS has provided retirement, disability, and survivors' benefits to eligible participants of the System. Under Article XVI, Section 17 of the Constitution of the State of California, the SCERS Board of Retirement (the Board) is vested with plenary authority and fiduciary responsibility for the investment of monies and the administration of the System. Together, the provisions of the State Constitution and the 1937 Act establish SCERS as a separate and independent governmental entity from the public employers that participate in SCERS. At June 30, 2018, the County of Sacramento; Superior Court of California, County of Sacramento; and twelve Special Districts participated in SCERS.

The Comprehensive Annual Financial Report

Responsibility for both the accuracy of the data and the completeness and fairness of the presentation in this CAFR rests with the management of the System. To the best of management's knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the System.

I trust that readers of this Report and participants of the System will find this information helpful in understanding SCERS and its commitment to financial integrity and participant service.

SCERS Mission Statement and Core Values

We are dedicated to providing the highest level of retirement services and managing System resources in an effective and prudent manner.

In fulfilling our mission as a retirement system, we are committed to:

- The highest levels of professionalism and fiduciary responsibility
- Acting with integrity
- Competent, courteous and respectful service to all
- Open and fair processes
- Safeguarding confidential information
- Cost-effective operations
- Stable funding and minimal contribution volatility
- Effective communication and helpful education
- Maintaining a highly competent and committed staff
- Continuous improvement
- Planning strategically for the future

Accounting System and Reports

Management of SCERS is responsible for establishing and maintaining internal controls designed to ensure that the System's assets are protected from loss, theft, or misuse. Responsibility for the accuracy, completeness, and fair presentation of information, and all disclosures in this CAFR and in the System's records, rests with SCERS' management. Brown Armstrong Accountancy Corporation, a certified public accounting firm, has audited the financial statements and related disclosures. The financial statement audit provides reasonable assurance that SCERS' financial statements are presented in conformity with accounting principles generally accepted in the United States and are free from material misstatements. The internal controls are designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that: (1) The cost of a control should not exceed the benefits likely to be derived; and (2) The assessment of costs and benefits requires estimates and judgments by management.

This report has been prepared in accordance with generally accepted accounting principles (GAAP) as promulgated by the Governmental Accounting Standards Board (GASB). GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of management's discussion and analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The System's MD&A can be found immediately following the independent auditor's report.

Investments – General Authority and SCERS

Article XVI, Section 17 of the Constitution of the State of California provides that "...notwithstanding any other provisions of law or this Constitution, the Retirement Board of a public pension or retirement system shall have plenary authority and fiduciary responsibility for investment of monies and administration of the system..." Article XVI, Section 17(a) further provides that "...the Retirement Board of a public pension or retirement system shall have sole and exclusive fiduciary responsibility over the assets. . ."

SCERS maintains an overall investment policy designed to achieve a diversified investment portfolio. An integral part of the investment policy is the strategic asset allocation, which is designed to provide an optimal mix of asset classes with return expectations that correspond to expected liabilities. The strategic asset allocation also emphasizes maximum diversification of the portfolio to protect the System from the possibility that a particular asset class may experience poor investment performance in a given period.

The current strategic asset allocation model was established as a result of an asset allocation study conducted in the 2016-17 fiscal year. SCERS' strategic asset allocation views risk exposures through multiple lenses, including functional and common factor exposures, in order to manage and maintain allocations that are aligned with SCERS' investment philosophy and objectives. This multiple lens approach uses a functional framework to group and classify segments of SCERS' portfolio in order to link segments that are exposed to similar economic environments and risk factors, and which would be expected to have similar roles and outcomes in a portfolio. The functional grouping takes a simplified approach at the asset category level, by breaking the portfolio into three asset categories, with greater complexity reserved at the asset class level. The asset categories include: (1) Growth; (2) Diversifying; and (3) Real Return.

SCERS' strategic asset allocation is a more risk balanced portfolio than the prior policy portfolio with a similar expected return profile, but with lower expected volatility (standard deviation), and a narrower range of potential outcomes, making it less susceptible to negative returns during down markets. It also increases diversification, especially to investment strategies with low and negative correlations to equity markets, and is expected to generate a greater level of cash flow for SCERS' plan.

For the fiscal year ended June 30, 2018, SCERS' investments provided a 10.1% rate of return (gross of fees), compared to the investment policy benchmark return of 8.2%.

More detailed information regarding SCERS' strategic asset allocation, professional investment advisors, and investment performance can be found in the Investment Section of this Report.

Actuarial Funding Status

SCERS' overall funding objective is to meet long-term benefit promises by maintaining a well-funded plan status through a combination of superior investment returns and employer and employee contributions which are both minimized and maintained as level as possible for each generation of active members. The greater the level of overall plan funding, the larger the ratio of assets accumulated to the actuarial accrued liability and the greater the investment potential. The advantage of a well-funded plan is that the benefits earned by participants are funded during their working careers and not by future generations of taxpayers.

To help reduce year-to-year volatility in employer contribution rates due to fluctuations in investment performance, SCERS smooths the calculation of actuarial assets over a rolling seven-year period. This not only stabilizes contribution rates but also improves the ability of the employer to plan for possible future increases or decreases in the rates.

SCERS engaged an independent actuarial consulting firm, Segal Consulting, to conduct its annual actuarial valuation as of June 30, 2018. Triennially, the System requests that its actuary perform an analysis of the appropriateness of all economic and non-economic assumptions. The most recent triennial analysis was performed as of June 30, 2016, and as a result of that analysis, the Board approved certain changes to the actuarial assumptions, which were incorporated in the actuarial valuation as of June 30, 2017.

At June 30, 2018, SCERS' funding ratio on a market value of assets basis was 82.5%. On an actuarial basis, the funding ratio was 81.4%, with the actuarial value of assets totaling $9.1 billion and the actuarial accrued liability totaling $11.2 billion. Deferred gains under the smoothing methodology exceeded deferred losses by $128.9 million as of June 30, 2018, an improvement from $81.0 million in losses as of June 30, 2017. Deferred investment gains/(losses) are recognized over a rolling seven-year period.

Budget

The Board approves SCERS' annual budget. The 1937 Act limits SCERS' annual administrative expenses, excluding the costs of administration for computer software and hardware and computer technology consulting services (IT costs), to twenty-one hundredths of one percent (0.21%) of the System's actuarial accrued liability. SCERS' administrative expenses have historically been below the limitation. Administrative expenses, excluding IT costs, were $5.9 million and $6.0 million for the years ended June 30, 2018 and June 30, 2017, respectively. SCERS administrative expenses for both years were 0.06% of the System's actuarial accrued liability.

Significant Activities

In 2017-18, SCERS developed a Strategic Management Program that includes an annual planning process for continuing the progress toward the goals and objectives of the SCERS 2014-18 Strategic Plan. The Strategic Management Program lays out specific actions SCERS staff will take during the fiscal year to accomplish the continuous improvement of the enterprise, with improved processes for measuring and tracking performance. The resulting plan is organized around six key themes that closely resemble those of the SCERS 2014-18 Strategic Plan. The following are significant activities which occurred during the fiscal year:

CUSTOMER SERVICE

- Established customer service priorities to reduce the processing time it takes for new retirees to receive their first pension payment.
- Engaged CEM Benchmarking, Inc . to analyze and quantify SCERS' administration costs and service levels, comparing the results to relevant peers. This allowed SCERS to better measure and manage performance, communicate to stakeholders, and focus on customer service levels.
- Improved recruiting and hiring processes to fill vacancies in key customer-service positions.
- Amended SCERS' Bylaws to remove the lengthy rules for the disability application process and replaced them with Disability Retirement Procedures (adopted by the Board in January 2016) designed to streamline and expedite disability retirement decisions.

INVESTMENTS

- Made structural modifications, including revised investment guidelines and benchmarks, and implementation plans, within underlying asset classes to align with SCERS' strategic asset allocation, which was adopted in January 2017.
- Fully implemented SCERS' International Equity asset class in line with the new strategic asset allocation.
- Conducted a U.S. Treasury manager search within SCERS' public fixed income portfolio.
- Conducted a systematic multi-factor large cap equity manager search within SCERS' Domestic Equity asset class.
- Conducted a manager search to transfer SCERS' core real estate separate account assets in exchange for shares in a core open-end commingled real estate fund.
- Restructured and implemented SCERS' Portfolio Overlay Program to align with SCERS' new strategic asset allocation.

SUSTAINABLE FUNDING

- Reached agreement with the Sacramento Metropolitan Fire District on a funding plan to amortize the $45 million unfunded actuarial accrued liability of the Florin Fire Protection District.
- Enrolled Rio Linda Elverta Recreation and Park District in SCERS as a participating employer.
- Worked with Segal Consulting and Cheiron on the actuarial audit of SCERS' Actuarial Valuation as of June 30, 2016 and Actuarial Experience Study (July 1, 2013 – June 30, 2016).

ENTERPRISE CAPABILITY AND TECHNOLOGY

- Selected and awarded a contract for a pension administration system to Morneau Shepell and started working with Morneau Shepell on this four-year project.
- Continued to work with Linea Solutions, Inc. to provide SCERS with pension administration system consulting services.
- Worked with Castle Peak Associates on requirements analysis for an investment accounting system for SCERS; issued a Request for Information.
- Engaged Digital Deployment to redesign the SCERS website and deploy it using modern technology. Deployment of the new website was completed in October 2018.

STAKEHOLDER RELATIONS

- Led multiple information sessions during collective bargaining sessions to educate members about employee contribution rate changes.
- Provided employers with multi-year retirement contribution projections to help facilitate budget planning.
- Updated and formalized operational policies to increase transparency, and clarify rules and procedures.
- Worked with Sacramento County Department of Personnel Services, Department of Finance, and Department of Technology on the transition of payroll system for special districts from Highline to COMPASS beginning January 1, 2018.
- Improved 1099-R practices for the 2018 calendar year and worked with assigned vendor to address and resolve omissions from the 2015 calendar year.

WORKFORCE DEVELOPMENT

- Worked with an executive search consultant to complete recruitment, selection, and on-boarding of successor Chief Executive Officer.
- Implemented a structured goal setting and performance evaluation process for SCERS' employees.
- Developed a SCERS Compensation Policy for executive management.

Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded the Certificate of Achievement for Excellence in Financial Reporting to SCERS for its CAFR for the fiscal years ended June 30, 2017 and 2016. In order to be granted this national award, a governmental entity must publish an easily readable and efficiently organized CAFR that meets the highest standards of governmental financial reporting. This was the nineteenth consecutive year that SCERS has received this prestigious award.

A Certificate of Achievement is valid for a period of one year. Management believes that this current CAFR continues to meet the requirements for earning a Certificate of Achievement, and it will be submitted to the GFOA for consideration of the award.

SCERS also received the GFOA Award for Outstanding Achievement in Popular Annual Financial Reporting for the fiscal year ended June 30, 2017. This was the ninth consecutive year SCERS has received this award.

Acknowledgements

This Report is intended to provide complete and reliable information with respect to the responsible stewardship of SCERS. The compilation of this Report is a product of the combined and dedicated effort of the System's staff. This Report is also a reflection of the leadership of the SCERS Board in assuring the prudent fiduciary oversight of SCERS. I would like to take this opportunity to express my thanks to the SCERS Board, Staff, and advisors for their commitment to SCERS and for working so diligently to ensure the successful operation of the System.

Respectfully submitted,

Eric Stern

INDEPENDENT AUDITOR'S REPORT

To the Audit Committee and Board of Retirement of the
Sacramento County Employees' Retirement System
Sacramento, California

Report on the Financial Statements

We have audited the accompanying Statements of Fiduciary Net Position of the Sacramento County Employees' Retirement System (SCERS) as of June 30, 2018 and 2017, the related Statements of Changes in Fiduciary Net Position for the fiscal years then ended, and the related notes to the financial statements, which collectively comprise SCERS' basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to SCERS' preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of SCERS' internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of SCERS as of June 30, 2018 and 2017, and the changes in fiduciary net position for the fiscal years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and required supplementary information (RSI), as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the management discussion and analysis and RSI in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise SCERS' basic financial statements. The other supplemental information and the introductory, investment, actuarial, and statistical sections, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The other supplemental information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplemental information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory, investment, actuarial, and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated December 6, 2018, on our consideration of SCERS' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of SCERS' internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering SCERS' internal control over financial reporting and compliance.

BROWN ARMSTRONG
ACCOUNTANCY CORPORATION

Brown Armstrong
Accountancy Corporation

Bakersfield, California
December 6, 2018

This page intentionally left blank.

This section presents management's discussion and analysis (MD&A) of the financial activities of the Sacramento County Employees' Retirement System (SCERS or the System) for the fiscal years ended June 30, 2018 and 2017. Readers are encouraged to consider the narrative overview and information presented in this MD&A in conjunction with the Letter of Transmittal beginning on page 6 of this Report and the Basic Financial Statements, Notes to the Basic Financial Statements, Required Supplementary Information, and Other Supplemental Information that follows.

FINANCIAL HIGHLIGHTS

As of June 30, 2018, SCERS' fiduciary net position restricted for pension benefits (net position) totaled $9.252 billion. This represented an increase of $667.7 million, or 7.8%, from the $8.584 billion in SCERS' net position as of June 30, 2017, which, in turn, represented an increase of $903.3 million, or 11.8%, over the $7.681 billion in net position as of June 30, 2016.

Additions to net position were $1,142.9 million, $1,342.3 million, and $214.1 million for the years ended June 30, 2018, 2017 and 2016, respectively. The decrease in total additions of $199.4 million, or 14.9%, in year ended June 30, 2018 was mainly due to lower investment performance and the increase in investment fees and expenses. Strong investment performance was the primary reason for the increase in total additions for the year ended June 30, 2017 of $1,128.2 million or 527.0%.

Deductions from net position were $475.2 million, $439.0 million, and $412.0 million for the years ended June 30, 2018, 2017 and 2016, respectively. The total deductions for the year ended June 30, 2018 increased by $36.2 million, or 8.2%, over the year ended June 30, 2017, which in turn, saw an increase in total deductions of $27.0 million, or 6.6%, over the year ended June 30, 2016. Increased monthly benefit payments due to an increase in the number of retirees and the annual cost-of-living adjustment were the primary reasons for the increase in total deductions for both years.

SCERS' funding objective is to meet long-term benefit obligations through contributions and investment income. In order to help achieve level and predictable contribution costs from one year to the next, SCERS bases the determination of contribution rates on an actuarial asset valuation method that gradually adjusts to the market value of assets (asset smoothing). Under this actuarial asset valuation methodology, any investment market returns for the year that are above or below the assumed investment return rate (7.5%, which was used to determine the contribution rates for fiscal years 2017-18 and 2016-17) are recognized over seven years (the asset smoothing period). This smoothed value is referred to as the Actuarial Value of Assets. By using the Actuarial Value of Assets to determine the contribution rates, SCERS is able to lower the year-to-year volatility in contribution rates that would come from using the market value of assets.

As of June 30, 2018, SCERS' total pension liability was $11.213 billion, up from $10.681 billion as of June 30, 2017. The employers' net pension liability was $1.961 billion as of June 30, 2018, decreased from $2.097 billion as of June 30, 2017. This decrease in employers' net pension liability is mainly due to favorable investment return offset by some actuarial losses. The fiduciary net position as a percentage of the total pension liability increased from 80.4% to 82.5%.

OVERVIEW OF THE FINANCIAL STATEMENTS

This MD&A serves as an introduction to the basic financial statements and other information accompanying the basic financial statements, which are comprised of the following components:

- Statements of Fiduciary Net Position - Pension Trust Fund
- Statements of Changes in Fiduciary Net Position - Pension Trust Fund
- Statements of Fiduciary Net Position - Agency Fund
- Notes to the Basic Financial Statements

The Statements of Fiduciary Net Position - Pension Trust Fund are snapshots of account balances at fiscal year end. These statements reflect assets available for future payments to retirees and their beneficiaries, and liabilities owed as of fiscal year end.

The Statements of Changes in Fiduciary Net Position - Pension Trust Fund reflect all the financial transactions that occurred during the year and show the impact of those activities as additions to or deductions from the plan. The trend of additions to versus deductions from the plan will indicate whether SCERS' financial position is improving or deteriorating over time.

The fiduciary fund statements report SCERS' net position restricted for pension benefits. Over time, increases or decreases in net position serve as one indicator of whether SCERS' financial health is improving or deteriorating. Other factors, such as market conditions or the System's fiduciary net position as a percentage of the employers' total pension liability should also be considered in measuring the System's overall health.

The Statements of Fiduciary Net Position - Agency Fund reflect assets held by SCERS in a custodial capacity or as an agent on behalf of others and do not measure the results of operations.

The Notes to the Basic Financial Statements are an integral part of the financial reports and provide additional information that is essential for a full understanding of the data provided in the financial statements.

In addition to the financial statements and accompanying notes, this Report presents certain **Required Supplementary Information** which includes the employers' changes in net pension liability and related ratios, actuarially determined contributions (ADC), actuarial assumptions used to calculate the ADC, historical money-weighted rate of return and other required supplementary information related to SCERS' defined benefit pension plan as required by GASB Statement No. 67.

Schedules of administrative expenses, investment fees and expenses, payments to consultants, and statements of changes in assets and liabilities for the agency fund are presented as **Other Supplemental Information** following the Required Supplementary Information.

FINANCIAL ANALYSIS

Net Position

SCERS' net position restricted for pension benefits as of June 30, 2018 totaled $9.252 billion, an increase of $667.7 million or 7.8% from the $$8.584 billion in net position as of June 30, 2017, which represented an increase of $903.3 million or 11.8% from the $7.681 billion in net position as of June 30, 2016. The increase in net position for the years ended June 30, 2018 and 2017 was due to strong investment returns offset to some degree by the benefits and expenses paid during the year exceeding the contributions received.

For the fiscal year ended June 30, 2018, the total fund return, gross of fees, of 10.1% was 1.9% higher than the return of the investment policy benchmark of 8.2%. While the majority of asset classes generated positive returns during fiscal year 2017-18, investments in the equity, absolute return, real estate, real assets, and private equity segments outperformed the policy benchmarks.

For the fiscal year ended June 30, 2017, the total fund return, gross of fees, of 13.7% was 2.0% higher than the return of the investment policy benchmark of 11.7%. While all asset classes generated positive returns during fiscal year 2016-2017, investments in the equity, fixed income, absolute return, real estate, and real assets segments outperformed the policy benchmarks, while private equity underperformed the policy benchmarks. All of the net position is available to meet SCERS' obligations to plan participants and beneficiaries.

The increase in cash and short-term investments as of June 30, 2018 compared to the prior year was due to increase in trading activities of short-term investments at year-end. The increase in receivables and investment purchases and other as of June 30, 2018 compared to the prior year were the result of increase in trading activity at year-end by the external investment managers. The increase in securities lending collateral and securities lending obligation was due to increase in the securities lending industry.

The decrease in cash and short-term investments as of June 30, 2017 compared to the prior year was the result of funding new investments and fulfilling capital commitments. The decrease in receivables and investment trades payable as of June 30, 2017 compared to the prior year were the result of a decrease in trading activity at the end of June by the external investment managers. The decrease in securities lending collateral and securities lending liability reflected a lower level of activity in the securities lending industry.

(**) Amounts as originally reported in the prior years.

GASB Statement No. 67 replaced GASB Statement No. 25 and redefined pension liability and expense for financial reporting purposes but does not apply to contribution amounts for pension funding purposes. When measuring the total pension liability, GASB uses the same actuarial cost method and the same type of discount rate as SCERS uses for funding. Therefore, the employers' total pension liability measured for financial reporting shown in this report is determined on the same basis as SCERS' actuarial accrued liability measured for funding.

SCERS retains an independent actuarial firm, Segal Consulting, to perform annual actuarial valuations to determine the employers' total pension liability (expected future benefits) and ADC. The annual actuarial valuation measures the current and projected assets and liabilities of the retirement system, as well as the system's funded status. This information forms the basis for establishing the actuary's recommendations for the employer and employee contribution rates for the upcoming fiscal year to pay the expected future benefits.

As of June 30, 2018, the employers' total pension liability was $11.213 billion, and the net pension liability (the total pension liability less the fiduciary net position) was $1.961 billion. The plan fiduciary net position as a percentage of the total pension liability was 82.5%. In general terms, this ratio means that as of June 30, 2018, SCERS had approximately 82 cents available for each dollar of anticipated future liability. As of June 30, 2017, the employers' total pension liability was $10.681 billion, and the net pension liability (the total pension liability less the fiduciary net position) was $2.097 billion. The plan fiduciary net position as a percentage of the total pension liability was 80.4%.

The Required Supplementary Information presents additional information regarding the net pension liability and the Actuarial Section of this report provides additional actuarial funding information.

Reserves

SCERS' reserves are established in accordance with the requirements of the 1937 Act, utilizing contributions and the accumulation of investment income, after satisfying administrative and investment expenses. Under GASB Statement No. 67, investments are stated at fair value instead of cost and include the recognition of unrealized gains and losses. However, for actuarial funding purposes, SCERS utilizes a seven-year smoothing methodology under which a portion of the market gains and losses is recognized and allocated to the reserves through interest crediting. The difference between the market value of assets (equivalent to the net position restricted for pension benefits) and the smoothed actuarial value of assets is tracked in the market stabilization reserve.

Higher-than-expected investment performance increased SCERS' market stabilization reserve from $(81.0) million as of June 30, 2017 to $128.9 million as of June 30, 2018.

The following table presents reserve summary for the fiscal years ended June 30, 2018, 2017, and 2016, respectively:

NET POSITION RESTRICTED FOR PENSION BENEFITS AT JUNE 30

(Dollar Amounts Expressed in Millions)

(*) Amounts as originally reported in the prior years.

Additions to Net Position

Financing for the benefits SCERS provides to its members comes primarily through the collection of employer and member (employee) contributions and from investment earnings. For the fiscal years ended June 30, 2018, 2017, and 2016, total additions were $1.143 billion, $1.342 billion, and $214.1 million, respectively.

For the fiscal years ended June 30, 2018, 2017, and 2016, combined employer and employee contributions were $301.5 million, $293.4 million, and $286.5 million, respectively. Fiscal years 2017-18 and 2016-17 employee contributions increased, while the employer contributions decreased mainly as a result of the employees in legacy benefit tiers paying more of the normal cost pursuant to collective bargaining or other employment agreements.

Net investment income/(loss) after investment fees and expenses were $841.4 million, $1.049 billion, and $(72.4) million for the fiscal years ended June 30, 2018, 2017, and 2016, respectively. The net investment gains and losses were driven primarily by investment performance of the portfolio. The Investment Section of this report provides a detailed discussion of the investment markets and investment performance.

Deductions from Net Position

SCERS' net position was primarily used for the payment of benefits to members and their beneficiaries, for the payment of contribution refunds to terminated employees, and for the cost of administering the System. For the fiscal years ended June 30, 2018, 2017, and 2016, total deductions were $475.2 million, $439.0 million, and $412.0 million, respectively.

Deductions increased by $36.2 million, or 8.2%, in the fiscal year ended June 30, 2018 and by $27.0 million, or 6.6%, in the fiscal year ended June 30, 2017. The primary cause of the increase in deductions in both years was due to the increase in monthly benefit payments resulting from an increase in the number of retired members and the annual cost-of-living adjustment paid to retirees and beneficiaries.

The Board of Retirement approves SCERS' annual administrative budget. The 1937 Act limits SCERS' annual administrative expenses, excluding the costs of administration for computer software and hardware and computer technology consulting services (IT costs), to twenty-one hundredths of one percent (0.21%) of the System's actuarial accrued liability. Administrative expenses of $5.9 million for the fiscal years ended June 30, 2018 and 2017, excluding IT costs, were 0.06% of the System's actuarial accrued liability. SCERS' administrative expenses have historically been below the limitation.

SCERS' FIDUCIARY RESPONSIBILITIES

SCERS' Board of Retirement and management staff are fiduciaries of the pension trust fund. Under the California Constitution and California state law, the net position must be used exclusively for the benefit of plan participants and their beneficiaries.

REQUESTS FOR INFORMATION

This report is designed to provide the Board of Retirement, SCERS members, participating employers, taxpayers, and other stakeholders and interested parties with a general overview of SCERS' finances and to show accountability for the money SCERS receives.

NOTE 1 - PLAN DESCRIPTION

The Sacramento County Employees' Retirement System (SCERS or the System) is a cost-sharing multiple-employer defined benefit pension plan, which operates under the County Employees Retirement Law of 1937 (Section 31450 et seq. of the California Government Code) (1937 Act) and the California Public Employees' Pension Reform Act of 2013 (PEPRA). The System was created by resolution of the Sacramento County (the County) Board of Supervisors on July 1, 1941, to provide retirement, disability, and death benefits for qualified employees of Sacramento County and participating Special Districts (Special Districts or Member Districts). SCERS is governed by a nine member Board of Retirement. Four are appointed by the County Board of Supervisors; four are elected by the members of the System (two by the Miscellaneous members, one by the Safety members and one by the Retiree members); and the County Director of Finance serves as an Ex-Officio member. An alternate Safety member and an alternate Retiree member are also elected by those respective member groups. The System is legally and fiscally independent of the County.

At June 30, 2018 and 2017, participating local government employers consisted of the County of Sacramento; Superior Court of California, County of Sacramento (Superior Court); and twelve and eleven special districts, respectively.

The System's membership consists of the following categories:

- Safety Tier 1 - Includes employees whose principal duties consist of law enforcement or fire suppression work or who occupy positions designated by law as safety positions and who have a membership start-date prior to June 25, 1995.
- Safety Tier 2 - Includes employees whose principal duties consist of law enforcement or fire suppression work or who occupy positions designated by law as safety positions and who have a membership start-date on or after June 25, 1995 but prior to January 1, 2012.
- Safety Tier 3 - Includes employees whose principal duties consist of law enforcement or fire suppression work or who occupy positions designated by law as safety positions and who have a membership start-date on or after January 1, 2012 but prior to January 1, 2013.
- Safety Tier 4 - Includes employees whose principal duties consist of law enforcement or fire suppression work or who occupy positions designated by law as safety positions and who have a membership start-date on or after January 1, 2013.
- Miscellaneous Tier 1 - Includes all members other than Safety who have a membership start-date prior to September 27, 1981.
- Miscellaneous Tier 2 - Includes all members other than Safety who have a membership start- date on or after September 27, 1981 and prior to June 27, 1993 and who elected not to become members of Miscellaneous Tier 3.
- Miscellaneous Tier 3 - Includes all members other than Safety who have a membership start- date on or after June 27, 1993, and those Miscellaneous Tier 2 members who elected to become members of this class. The Miscellaneous Tier 3 is closed to employees of Sacramento County who have a membership start-date on or after January 1, 2012.
- Miscellaneous Tier 4 - Includes members other than Safety who are employees of Sacramento County and have a membership start-date on or after January 1, 2012 but prior to January 1, 2013.
- Miscellaneous Tier 5 - Includes all members other than Safety who have a membership start-date on or after January 1, 2013.

*Includes terminated members due a refund of member contributions.

(Dollar Amounts Expressed in Thousands)

Pension Benefits

The System's benefits are established by the provisions of the 1937 Act and PEPRA and provide for retirement, death, and disability benefits. All permanent full-time and part- time employees of the County, Superior Court and Member Districts are eligible to participate in the System. Upon reaching five years of service, participants have earned the right to receive a retirement benefit, subject to certain restrictions if retirement is prior to attaining age 50 or if less than 10 years of service has been achieved for Miscellaneous Tiers 1, 2, 3 and 4 and Safety Tiers 1, 2, and 3, or prior to attaining age 52 or if less than 5 years of service has been achieved for Miscellaneous Tier 5, or prior to attaining age 50 or if less than 5 years of service has been achieved for Safety Tier 4.

Effective June 29, 2003, the County Board of Supervisors adopted new benefit formulas for all SCERS members, including the employees of Member Districts, for service credit prospectively from June 29, 2003, and for County employees, retroactively to service credit which precedes that date. In accordance with applicable retirement law, each SCERS Member District's governing body determined whether or not to apply these formulas retroactively for service credit earned prior to June 29, 2003 by their employees.

Retirement benefits under Safety Tiers 1 and 2 and Miscellaneous Tiers 1, 2 and 3 are as follows:

- Members covered under Safety Tier 1 who retire at age 50, or thereafter, are entitled to a retirement benefit, payable monthly for life, equal to 3 percent of their final-average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 4 percent annually. Final-average salary is the member's average salary for the highest twelve consecutive months of credited service.
- Members covered under Safety Tier 2 who retire at age 50, or thereafter, are entitled to a retirement benefit, payable monthly for life, equal to 3 percent of their final-average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 2 percent annually. Final-average salary is the member's average salary for the highest thirty-six consecutive months of credited service.
- Members covered under Miscellaneous Tier 1 who retire at age 50 are entitled to a retirement benefit, payable monthly for life, which is equal to 1.48 percent of their final-average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 4 percent annually. Final-average salary is the member's average salary for the highest twelve consecutive months of credited service.
- Members covered under Miscellaneous Tier 2 who retire at age 50 are entitled to a retirement benefit, payable monthly for life, equal to 1.48 percent of their final-average salary for each year of credited service. There is no cost-of-living adjustment. Final-average salary is the member's average salary for the highest thirty-six consecutive months of credited service.
- Members covered under Miscellaneous Tier 3 who retire at age 50 are entitled to a retirement benefit, payable monthly for life, equal to 1.48 percent of their final-average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 2 percent annually. Final-average salary is the member's average salary for the highest thirty-six consecutive months of credited service.

The retirement benefits of Miscellaneous Tiers 1, 2, and 3 members who retire after age 50 are increased by an age factor for each quarter year of age up to a maximum of 2.61 percent of final-average salary for each year of credited service at age 62.

Members whose employers determined not to retroactively apply the formulas to service credit earned prior to June 29, 2003 will continue to have their retirement benefits for that service calculated pursuant to the formulas in effect at the time the service was earned (i.e., Safety and Miscellaneous members who retire at age 50 earn 2 percent and 1.1 percent, respectively, of their final-average salary for each year of credited service).

Effective January 1, 2012, the County Board of Supervisors adopted new tiers for County employees hired on or after January 1, 2012, but before January 1, 2013. Retirement benefits under these tiers are as follows:

- Members covered under Safety Tier 3 who retire at age 50 are entitled to a retirement benefit, payable monthly for life, equal to 2.29 percent of their final-average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 2 percent annually. Final-average salary is the member's average salary for the highest thirty-six consecutive months of credited service.
- Members covered under Miscellaneous Tier 4 who retire at age 50 are entitled to a retirement benefit, payable monthly for life, equal to 1.18 percent of their final-average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 2 percent annually. Final-average salary is the member's average salary for the highest thirty-six consecutive months of credited service.

The retirement benefits of Safety Tier 3 members who retire after age 50 are increased by an age factor for each quarter year of age up to a maximum of 3 percent of final-average salary for each year of credited service at age 55. The retirement benefits of Miscellaneous Tier 4 members who retire after age 50 are increased by an age factor for each quarter year of age up to a maximum of 2.43 percent of final-average salary for each year of credited service at age 65.

Effective January 1, 2013, with the implementation of PEPRA, the County Board of Supervisors adopted new tiers for employees of the County, Superior Court and Member Districts who are eligible to participate in the System and who were hired on or after January 1, 2013. Retirement benefits under these new tiers are as follows:

- Members covered under Safety Tier 4 who retire at age 50 are entitled to a retirement benefit, payable monthly for life, equal to 2 percent of their final-average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 2 percent annually. Final-average salary is the member's average salary for the highest thirty-six consecutive months of credited service.
- Members covered under Miscellaneous Tier 5 who retire at age 52 are entitled to a retirement benefit, payable monthly for life, equal to 1 percent of their final-average salary for each year of credited service. This benefit includes a cost-of-living adjustment of up to 2 percent annually. Final-average salary is the member's average salary for the highest thirty-six consecutive months of credited service.

The retirement benefits of Safety Tier 4 members who retire after age 50 are increased by an age factor for each quarter year of age up to a maximum of 2.7 percent of final-average salary for each year of credited service at age 57. The retirement benefits of Miscellaneous Tier 5 members who retire after age 52 are increased by an age factor for each quarter year of age up to a maximum of 2.5 percent of final-average salary for each year of credited service at age 67.

Member Termination

Upon separation from employment with a participating employer, members' accumulated contributions are refundable with interest accrued through the prior six-month period ended June 30 or December 31. Interest on member accounts is credited semiannually on June 30 and December 31. Withdrawal of such accumulated contributions results in forfeiture of the related benefits.

(Dollar Amounts Expressed in Thousands)

Financing

Benefits payable by the System are financed through member contributions, employer contributions, and earnings from investments. Member contributions are required by law. Contribution rates, which are actuarially determined, are based on age at entry into the System (a single rate is used for members entering the System after January 1, 1975). County, Superior Court and Member Districts' contributions are actuarially determined to provide for the balance of contributions needed. All contribution rates are reviewed and revised annually. The authority for both benefit provisions and contribution obligations is derived from the 1937 Act and PEPRA.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

SCERS reports fiduciary funds at June 30, 2018 and 2017, which include pension trust and agency funds. The pension trust fund is used to report resources that are required to be held in trust for the members and the beneficiaries of the defined benefit pension plan, and the agency fund accounts for assets held by SCERS in a custodial capacity or as an agent on behalf of the participating employers to fund the Retiree Medical and Dental Insurance Program. See Note 8 for a detailed description of the program. The pension trust fund is accounted for on a flow of economic resources measurement focus and the accrual basis of accounting. The agency fund is custodial in nature and does not measure the results of operations. Assets and liabilities are recorded using the accrual basis of accounting.

Basis of Accounting

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and reporting guidelines set forth by the Governmental Accounting Standards Board (GASB).

Valuation of Investments

The majority of the investments held at June 30, 2018 and 2017 are in the custody of, or controlled by, State Street Bank, the System's custodian. The System's investment portfolio consists of domestic and international equities, domestic and international fixed income, real estate, real assets, absolute return, private equity, and private credit. The diversity of the System's investment portfolio requires a wide range of techniques to determine fair value. Investments are valued at their fair value in accordance with GASB Statement No. 72, Fair Value Measurement and Application, which results in the recognition of fair value gains and losses. See Note 3, Section 2 for disclosures related to investment classification and valuation.

Contributions and Benefits

Employee and employer contributions are recognized when due pursuant to statutory requirements. Benefits and refunds are recognized when the benefits are currently due and payable in accordance with the terms of the plan.

Income and Expenses

Interest income is recognized as it accrues. Dividend income is recognized when the dividends are declared. Realized gains and losses and unrealized gains and losses on investments are combined and reported together as the net appreciation (depreciation) in the fair value of investments. Expenses are recorded when the corresponding liabilities are incurred, regardless of when payment is made. Investment purchases and sales are recorded based on trade date accounting.

(Dollar Amounts Expressed in Thousands)

Securities Lending

Securities lending transactions are short-term collateralized loans of the System's securities for the purpose of generating additional investment income. For each lending transaction, the System receives either cash collateral or non-cash collateral. The underlying securities out on loan are reported on the System's Statements of Fiduciary Net Position as if the lending transactions had not occurred. Cash collateral received for the loaned securities is reported as securities lending liability on the Statements of Fiduciary Net Position. Cash collateral is reinvested in the lending agent's cash collateral investment pool and is valued at fair value and is reported as securities lending collateral on the Statements of Fiduciary Net Position. Non-cash collateral held is not reported on the Statements of Fiduciary Net Position nor is there a corresponding liability reported on the financial statements as the System does not have the ability to pledge or sell them without a borrower default. See Note 3 for disclosures related to securities lending transactions.

Capital Assets

Capital assets are defined as assets with an initial individual cost of $5 thousand or more and an estimated useful life in excess of one year. Capital assets consist of furniture, building improvements, and intangible assets, which are recorded at cost on the Statements of Fiduciary Net Position, net of accumulated depreciation/amortization. Depreciation/amortization is charged to operations using the straight-line method on the estimated useful life of the related asset and is included in administrative expenses on the Statements of Changes in Fiduciary Net Position. Estimated useful lives for furniture and building improvements are depreciated over 10 years. Intangible assets for SCERS' IT Modernization Project will be depreciated over 10 years when it is ready for its intended use.

Other Assets

Other assets consist of other accounts receivable, prepaid expenses, and security deposits.

Administrative Expenses

Administrative costs are financed through employer and employee contributions and earnings from investments.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Actual results could differ from those estimates.

Reclassification

Certain reclassifications have been made to June 30, 2017 balances to conform to the presentation as of and for the fiscal year ended June 30, 2018.

(Dollar Amounts Expressed in Thousands)

NOTE 3 - CASH AND INVESTMENTS

SECTION 1: INVESTMENT POLICIES

Article XVI, Section 17 of the Constitution of the State of California provides that "...notwithstanding any other provisions of law or this Constitution, the Retirement Board of a public pension or retirement system shall have plenary authority and fiduciary responsibility for investment of monies and administration of the system..." Article XVI, Section 17(a) further provides that "...the Retirement Board of a public pension or retirement system shall have sole and exclusive fiduciary responsibility over the assets..." The investment authority for the System rests primarily through the "prudent person rule," as set forth in Section 31595 of the 1937 Act, which establishes a standard for all fiduciaries, including anyone with investment authority on behalf of the System.

Asset Allocation

SCERS maintains an overall investment policy designed to achieve a diversified investment portfolio. An integral part of the investment policy is the strategic asset allocation, which is designed to provide an optimal mix of asset classes with return expectations that correspond to expected liabilities. The strategic asset allocation also emphasizes maximum diversification of the portfolio to protect the System from the possibility that a particular asset class may experience poor investment performance in a given period. The System's adopted asset allocation policy as of June 30, 2018 and 2017 is as follows:

	Target Allocation	
Asset Class	2018	2017
US Equity	21.0 %	22.5 %
International Equity	20.0	22.5
Fixed Income	20.0	20.0
Absolute Return	10.0	10.0
Real Estate	7.0	- *
Real Assets	9.0	15.0
Private Credit	4.0	- **
Private Equity	9.0	10.0
	100.0 %	100.0 %

* Target allocation for real estate was included in the real assets asset class.
**Target allocation for private credit was included in the private equity asset class.

(Dollar Amounts Expressed in Thousands)

SECTION 2: INVESTMENT SUMMARY

Cash Invested with Sacramento County Treasurer

The System invests cash held for benefit payments and general operations in the County Treasurer's pool. The County Treasury Oversight Committee is responsible for regulatory oversight of the pool. The System's share of the County Treasurer's pool is separately accounted for, and interest earned, net of related expenses, is apportioned quarterly based on the proportion of the System's average daily cash balance to the total of the pooled cash and investments.

Cash deposited in the Sacramento County Treasurer's pool is stated at fair value. The value of the System's pool shares is determined on an amortized cost basis, which approximates fair value. The fair value of the System's cash invested with the County Treasurer totaled $13,164 and $4,065 at June 30, 2018 and 2017, respectively. The pool was not rated, and the weighted-average maturity of the pool was 309 days and 277 days at June 30, 2018 and 2017, respectively.

Interest earned but not received from the County Treasurer at year end is reported as a component of accrued investment income on the Statements of Fiduciary Net Position. Cash and investments included within the County Treasurer's pool are described in the County's Comprehensive Annual Financial Report.

Other Cash and Cash Equivalents

At June 30, 2018 and 2017, other cash and cash equivalents constituted balances in bank demand deposit accounts of $2,029 and $30,639, respectively.

Short-Term Investments with Fiscal Agents

Short-term investments, which include highly-liquid investments expected to be utilized by the System within 30-90 days, are reported at fair value. These investments may include securities that have a maturity in excess of 90 days but are readily marketable. At June 30, 2018 and 2017, the fair value of the System's short-term investments with fiscal agents was $274,620 and $207,129, respectively. These totals consisted of investments in the State Street Short-Term Investment Fund (STIF). The STIF is designed to provide qualified benefit plans with an investment vehicle that may be accessed on a daily basis. The STIF is limited to investing in securities that are rated A-1 by Moody's Investors Services and P-1 by Standard & Poor's Corporation (S&P) at the time of issuance. As of June 30, 2018 and 2017, the STIF is not rated by credit rating agencies. Most investments range in maturity from overnight to 90 days with 23% and 20% of the investment between 91 days and 13 months, respectively. For the fiscal years ended June 30, 2018 and 2017, the weighted-average maturities were 30 days and 24 days, respectively. Investments in the STIF from all participating custodial clients of State Street were $53.4 billion and $66.8 billion on June 30, 2018 and 2017, respectively.

Fair Value of Investments

The System measures and records its investments using fair value measurement guidelines established by U.S. generally accepted accounting principles (GAAP). These guidelines recognize a three-tiered fair value hierarchy, as follows:

- Level 1: Quoted prices for identical investments in active markets;
- Level 2: Observable inputs other than quoted market prices; and,
- Level 3: Unobservable inputs.

(Dollar Amounts Expressed in Thousands)

The System had the following recurring fair value measurements at June 30, 2018 and 2017.

June 30, 2018		Fair Value Measurements by Using		
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Equity Securities

The majority of the System's domestic and international equity securities are actively traded on major stock exchanges or over-the-counter (OTC). Investments listed or traded on a securities exchange are valued at fair value as of the close of trading on the valuation day. Fair value is determined based on the last reported trade price on the exchange considered to be the primary market for such security. Listed investments that are not traded on a particular day are valued at the last known price which is deemed best to reflect their fair value. Equity securities classified in Level 1 are valued using prices quoted in active markets for those securities.

Fixed Income Securities

Debt securities consist of investments in customized separate accounts and commingled funds which primarily invest in negotiable obligations of the U.S. Government and U.S. Government-sponsored agencies, U.S. and non-U.S. corporations, securitized offerings backed by residential and commercial mortgages, and non-dollar denominated sovereign states. Debt securities that are not actively traded are valued by pricing vendors, which use modeling techniques that include market observable inputs required to develop a fair value, are classified in Level 2. Typical inputs include recent trades, yields, price quotes, cash flows, maturity, credit ratings, and other assumptions based upon the specifics of the asset type.

Real Estate - Direct Holdings

Direct investments in real estate include offices, apartments, retail, and industrial properties, which are classified in Level 3. Properties owned directly are subject to annual independent third party appraisals performed in accordance with the Uniform Standards of Professional Appraisal Practice. The fair value for each property is calculated by discounting the future cash flows (including the projected sales proceeds), using an appropriate discount rate. The significant unobservable inputs used in the fair value measurement of the investments in real estate are discount rate, exit capitalization rates, and revenue growth rates. These rates are based on the location, type and nature of each property, and current and anticipated market conditions, which are derived from appraisers, industry publications and from the experience of the advisor's valuations, acquisitions, asset management and capital markets departments. Certain real estate investments are leveraged, and the loan amount is recorded in the Statements of Fiduciary Net Position. Refer to Note 9 for disclosures regarding mortgage obligations. As of June 30, 2018 and 2017, total Level 3 real asset investments were $338,780 and $307,294 respectively. In the opinion of management, the reported amounts fairly represent the estimated fair value as of June 30, 2018 and 2017. However, the estimated fair value may differ from the actual amount that could be realized in the marketplace.

Investment Derivative Instruments

The fair values of derivative contracts can be affected by changes in interest rates, foreign exchange rates, commodity prices, credit spreads, market volatility, expected return, liquidity and other factors. The majority of the System's derivative instruments are traded in the OTC derivative market and are classified within Level 2. OTC derivatives classified within Level 2 are valued using models that utilize actively quoted or observable market input values from external market data providers, third-party pricing vendors and/or recent trading activity. The fair values of OTC derivatives for swaps and forward contracts are determined using discounted cash flow models. The fair values of option contracts and warrants are determined using Black-Scholes option pricing models. These models' key inputs include the contractual terms of the respective contract along with significant observable inputs, including interest rates, currency rates, credit spreads, equity prices, index dividend yield, volatility, and other factors. The fair value of rights is calculated using the same parameters used for pricing options, including the rights' subscription price, prevailing interest rates, time to expiration, and the share price of the underlying stock, taking into consideration the level of its volatility. Futures positions are settled in cash on a daily basis and thus have no fair value.

Investments Measured at the Net Asset Value (NAV)

Investments valued using the net asset value (NAV) per share (or its equivalent) are investments in non-governmental pooled investment vehicles (i.e., limited partner or non-managing member interest (LP/LLC Interest). These alternative investments, unlike more traditional investments, generally do not have readily obtainable market values and are generally valued at the most recent net asset value per unit or based on capital account information available from the general partners of such vehicles. If June 30 valuations are not available, the value is derived from the most recently available valuation taking into account of subsequent cash flow activities.

Absolute Return

Absolute return investments are made on a direct basis in limited partnerships, commingled funds, and separate accounts, and through externally managed customized separate accounts (CSA). Each CSA manager's investments consist of portfolio funds and co-investments as well as marketable securities held from time to time as a result of a distribution from a portfolio fund.

Absolute return investments include commingled funds that invest in domestic and international investment strategies including: (1) Market neutral strategies such as equity or fixed income market neutral, fixed income arbitrage, and convertible bond arbitrage; (2) Event driven strategies such as risk arbitrage, merger arbitrage, distressed debt, credit and other event-driven strategies; (3) Equity and credit long/short strategies where there is a combination of long and short positions primarily in exchange traded securities, with a net market exposure less than 100% of that of the overall equity or fixed income market. Strategies may be focused on U.S., non-U.S., and/or specialty mandates; (4) Global Macro strategies such as all market portfolios, opportunistic long-only, managed futures, currency, dedicated short selling strategies or other specialty strategies; and (5) Multi-strategies where absolute return managers invest using a combination of previously described strategies.

Absolute return investments are generally less liquid as compared to equity and fixed income and more liquid as compared to private market investments, such as real assets, real estate, private credit, and private equity. Direct absolute return investments consist of securities traded on national security exchanges, as well as securities that do not have readily determinable market values (illiquid securities). The fund manager's evaluation of the fair value of portfolio funds is based on the most recent available valuation information provided to it by the portfolio funds, adjusted for subsequent distributions from and capital contributions to such portfolio funds, if any.

Typically, the fair value of investments is determined by the fund manager in good faith and in compliance with the following guidelines:

- The value of illiquid investments is determined by the fund manager in good faith and in compliance with the definition of fair value under U.S. GAAP (Financial Accounting Standards Board (FASB) Accounting Standards Codification, Topic 820, Fair Value Measures and Disclosures); provided, however, in some circumstances certain illiquid investments may require reporting financial information and valuations in accordance with accounting standards other than U.S. GAAP, such as under International Financial Reporting Standards.

(Dollar Amounts Expressed in Thousands)

- Securities that are traded on a national securities exchange are valued at their last reported sales prices on the valuation date on the national securities exchange on which such securities are principally traded or on a consolidated tape which includes such exchange, or, if there are no sales on such date on such exchange or consolidated tape, securities are valued at the mean between the last "bid" and "asked" prices at the close of trading on such date on the largest national securities exchange on which such securities are traded.
- Securities not traded on a national securities exchange, but traded over the counter, are valued at the last reported sales price as reported by the Nasdaq National Market of the Nasdaq Stock Market, or if such prices are not reported by the Nasdaq Stock Market, as reported by the National Quotation Bureau, Inc.; or if such prices are not reported by the National Quotation Bureau, the valuation of options or notional principal contracts not traded on a national securities exchange may be determined in good faith by a reliable source selected by the fund manager.
- Commodity interests traded on a United States or foreign exchange are valued at their last reported settlement price on the valuation date on the exchange on which such interests were purchased or sold. Commodity interests not traded on a United States or foreign exchange are valued at the mean between their last "bid" and "asked" prices on the date as of which the value is being determined, as reported by a reliable source selected in good faith by the fund manager.
- Short-term money market instruments and bank deposits are valued at cost plus accrued interest to the date of valuation.

These funds generally have monthly or quarterly redemption frequency and require between 30 and 90 days' prior written notice, limiting the System's ability to respond quickly to changes in market conditions.

Equity and Fixed Income Commingled Funds

Certain equity and fixed income investments are invested in a commingled fund to provide dedicated exposure to a specific segment of the market and are valued at NAV. An example would be a core plus fixed income mandate where SCERS receives the high yield credit exposure through a commingled fund that is managed by the investment manager. The most significant input into the NAV of such an entity is the value of its investment holdings. These holdings are valued by the fund manager on a continuous basis and audited annually. The valuation assumptions are based upon both market and property specific inputs which are not observable and involve a certain degree of expert judgment. Withdrawals from such funds may be made after valuation has been determined either daily or monthly and require up to 60 days advance notice.

Real Estate and Real Assets

Core and core plus real estate is held either directly via a real estate holding entity or as a limited partner in a commingled fund. Real asset investments are held in limited partnerships. Limited partner interest is valued using the NAV of the partnership. The most significant input into the NAV of such an entity is the value of its investment holdings. These holdings are valued by the general partners on a continuous basis, audited annually, and periodically appraised by an independent third party. The valuation assumptions are based upon both market and property specific inputs which are not observable and involve a certain degree of expert judgment. Real estate and real asset investments in a closed-end commingled fund are long-term and illiquid in nature. As a result, investors are subject to redemption restrictions which generally limit distributions and restrict the ability of limited partners to exit a partnership investment. These investments cannot be redeemed with the funds unless sold in a secondary market. Distributions from each fund will be received as the underlying investments of the funds are liquidated. It is expected that the underlying assets of the funds will be liquidated over 2 to 12 years.

(Dollar Amounts Expressed in Thousands)

Private Credit and Private Equity

Private equity investments include limited partnerships, commingled funds and fund of funds (FoF) that invest in domestic and international private buyouts, venture capital, mezzanine capital, and distressed debt. Private credit investments include limited partnerships, commingled funds, and separate accounts that invest in direct lending, and opportunistic credit strategies. Private equity and private credit investments are made both on a direct basis in limited partnerships, commingled funds, separate accounts, and through externally managed FoF's. Each FoF manager's investments consist of portfolio funds and co-investments as well as marketable securities held from time to time as a result of a distribution from a portfolio fund.

These investments are long-term and illiquid in nature. As a result, limited partners are limited in their ability to exit a partnership investment prior to its dissolution, other than selling their interest in a private equity secondary market. Distributions are received through cash flows and the liquidation of the underlying assets of the fund. It is expected that the underlying assets of the fund would be liquidated over 2 to 10 years.

Limited partner interest in commingled funds is valued by using the NAV of the partnership. The most significant input into the NAV of such an entity is the value of its investment holdings. These holdings are valued by the general partners on a continuous basis, audited annually, and periodically appraised by an independent third party.

Typically, the fair value of all investments is determined by the fund manager in good faith and in compliance with the definition of fair value under U.S. GAAP (FASB Accounting Standards Codification, Topic 820, Fair Value Measures and Disclosures). In some circumstances, partnership agreements require reporting financial information and valuations in accordance with accounting standards other than GAAP, such as under International Financial Reporting Standards. The measure of fair value by the fund manager is typically conducted on a quarterly basis. Marketable securities are valued according to the most recent public market price with appropriate discounts to reflect any contractual or regulatory restriction upon sale.

The fair value of each investment as reported does not necessarily represent the amount that may ultimately be realized, since such amounts depend upon future circumstances that cannot reasonably be determined until the position is actually liquidated. The evaluation of the fair value of portfolio funds is based on the most recent available valuation information provided by the portfolio funds, adjusted for subsequent distributions from and capital contributions to such portfolio funds, if any. The evaluation of the fair value of co-investments is based on the most recent information available at the time of valuation ascribed to such investments by the sponsor partnership. If the manager does not agree with this valuation, holds different securities than the sponsor partnership, is unable to obtain the sponsor partnership's valuation, or has information that results in a different valuation, the manager may use its own internal evaluation of fair value. The assumptions are based upon the nature of the investment and the underlying business. The valuation techniques vary based upon investment type and involve a certain degree of expert judgment.

Annual Money-Weighted Rate of Return

The money-weighted rate of return expresses investment performance, net of investment expenses, adjusted for the changing amounts actually invested. For the fiscal years ended June 30, 2018 and 2017, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expenses, were 9.8% and 13.6%, respectively.

(Dollar Amounts Expressed in Thousands)

SECTION 3: SECURITIES LENDING

State statutes permit the System to participate in securities lending transactions and, pursuant to a Securities Lending Authorization Agreement, the System has authorized State Street Bank and Trust Company (State Street) to act as its agent in lending the System's securities to broker-dealers and banks pursuant to an approved loan agreement.

During the fiscal years ended June 30, 2018 and 2017, on behalf of the System, State Street loaned securities held by State Street as custodian, including U.S. government and agency obligations, domestic corporate bonds, and domestic and international equities and received, as collateral, U.S. and foreign currency, U.S. government, U.S. corporate bonds, U.S. equity, and international equity securities. The System does not have the ability to pledge or sell security collateral absent a borrower defaults. Borrowers are required to deliver collateral for each loan equal to a minimum of 100% of the market value of the loaned security.

During the fiscal years ended June 30, 2018 and 2017, SCERS did not impose any restrictions on the amount of the loans that State Street made on its behalf. During the fiscal years ended June 30, 2018 and 2017, there were no failures to return loaned securities or pay distributions thereon by any borrowers. Moreover, there were no losses resulting from a default of the borrowers or State Street.

During the fiscal years ended June 30, 2018 and 2017, SCERS and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified tax-exempt plan lenders, in a collective investment pool. Because the loans were terminable at will, their duration did not generally match the duration of the investments made with cash collateral. Since the collateral received from the borrowers was greater than the amounts borrowed, the System had minimal credit risk exposure to the borrowers. Furthermore, the lending agreement with the custodian requires the custodian to indemnify the System if the borrower fails to return the loaned securities.

Additional information regarding the cash collateral investment pool (collateral pool) follows:

Method for Determining Fair Value. The fair value of investments held by the collateral pool is based upon valuations provided by a recognized pricing service.

Policy for Utilizing Amortized Cost Method. Because the collateral pool does not meet the requirements of Rule 2a-7 of the Investment Company Act of 1940, State Street has valued the collateral pool investments at fair value for reporting purposes.

Regulatory Oversight. The collateral pool is not registered with the Securities and Exchange Commission. State Street, and consequently the investment vehicles it sponsors (including the collateral pool), are subject to the oversight of the Federal Reserve Board and the Massachusetts Commissioner of Banks. The fair value of the System's position in the collateral pool is the same as the System's pro rata share of the collateral pool.

(Dollar Amounts Expressed in Thousands)

Collateral and related securities on loan at June 30, 2018 and 2017 were as follows:

	June 30, 2018			
Security Description	Fair Value of Reinvested Cash Collateral	Cash Collateral Value	Non-Cash Collateral Value	Fair Value of Securities on Loan
Fixed income	$247,764	$242,703	$56,701	$299,415
Equity	117,970	115,092	19,118	134,439
Total	$365,734	$357,795	$75,819	$433,854

	June 30, 2017			
Security Description	Fair Value of Reinvested Cash Collateral	Cash Collateral Value	Non-Cash Collateral Value	Fair Value of Securities on Loan
Fixed income	$168,697	$165,058	$13,828	$178,862
Equity	183,537	178,723	13,530	192,286
Total	$352,234	$343,781	$27,358	$371,148

Securities Lending Collateral Credit Risk

All of the cash collateral received for securities lending is invested in the State Street Quality D STIF, which is not rated by credit rating agencies. At the time of purchase, all securities with maturities of 13 months or less must be rated at least A1, P1 or F1 and all securities with maturities in excess of 13 months must be rated A- or A3 by any two of the nationally-recognized statistical rating organizations or, if unrated, be of comparable quality. The fund may invest in other State Street managed vehicles provided they conform to the guidelines. As of June 30, 2018 and 2017, the STIF was not rated.

Securities Lending Collateral Interest Rate Risk

Quality D's Investment Policy Guidelines provide that the lending agent shall maintain the dollar-weighted average maturity of the Quality D fund in a manner that the lending agent believes is appropriate to the objective of the Quality D Fund; provided that (i) in no event shall any Eligible Security be acquired with a remaining legal final maturity of greater than 18 months, (ii) the lending agent shall maintain a dollar- weighted average maturity of the Quality D Fund not to exceed 75 calendar days and (iii) the lending agent shall maintain a dollar-weighted average maturity to final of the Quality D Fund not to exceed 180 calendar days. As of June 30, 2018 and 2017, the weighted average maturity was 27 days and 29 days, respectively.

(Dollar Amounts Expressed in Thousands)

SECTION 4: DEPOSIT AND INVESTMENT RISKS

Pursuant to GASB Statement No. 40, *Deposit and Investment Risk Disclosure*, the following schedules disclose the System's investments subject to certain types of risk.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to a debt instrument will not fulfill its obligations. This is measured by the assignment of ratings by nationally-recognized statistical rating organizations.

SCERS utilizes external investment managers to manage its portfolios. SCERS' Investment Policy specifies that fixed income investments will include both active and passive index investments in U.S. Treasury and agency securities, corporate bonds, mortgage-backed and asset-backed securities and non-dollar denominated sovereign and corporate debt.

SCERS' portfolio has two actively-managed investment strategies, referenced as strategy 1 and strategy 2. Strategy 2 will have a minimum average credit quality rating of Baa1/BBB+ by a Nationally Recognized Statistical Rating Organization (NRSRO). Portfolio diversification is constrained by the following parameters in order to minimize overall market and credit risk:

- For strategy 2, securities rated below B-/B3 by an NRSRO are limited to 10% of the portfolio, at the time of purchase, while securities rated below CCC- or Caa3 at the time of purchase, by an NRSRO are prohibited.
- No more than 10% and 5% of the portfolio will be concentrated in any one issuer except U.S. Government and agency securities for strategies 1 and 2, respectively.
- No more than 20% and 25% of the portfolio will be invested in high yield or below investment grade straight securities for strategies 1 and 2, respectively.
- No more than 15% and 10% of the portfolio will be invested in convertible securities, which include bonds and preferred issues, for strategies 1 and 2, respectively.
- No more than 20% of the portfolio will be invested in non-U.S. dollar bonds for each strategy.
- No more than 15% of the portfolio will be invested in Emerging Markets, at the time of purchase, for strategy 2.
- Net exposure to interest rate derivatives will be limited to 25% of the duration of the portfolio for strategy 2.
- Net exposure to credit derivatives (CDS, CDX) will be limited to 25% of the market value of the portfolio for strategy 2.
- Gross notional exposure to credit derivatives (CDS, CDX) will be limited to 50% of the market value of the portfolio for strategy 2.

NA represents securities explicitly guaranteed by the U.S. government, which are not subject to the GASB Statement No. 40 credit risk disclosure requirements. NR represents those securities that are not rated.

(Dollar Amounts Expressed in Thousands)

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. As of June 30, 2018 and 2017, the System had no single issuer that exceeds 5% of total investments per GASB Statement No. 40 disclosure requirements or any one issuer which represents 5% or more of total fiduciary net position in accordance with GASB Statement No. 67. Investments issued or explicitly guaranteed by the U.S. government and investments in mutual funds, external investment pools, and other pooled investments are exempt from the disclosure requirements.

The System's investment policy does not allow more than 5% of the total portfolio fair value to be invested in any one issuer, and as of June 30, 2018 and 2017, the System had no issuer that exceeds 5% of total portfolio market value. As noted in the previous discussion of credit risk, manager investment guidelines place limitations on the maximum holdings in any one issuer.

Custodial Credit Risk

Custodial credit risk is the risk that in the event a financial institution or counterparty fails, the System would not be able to recover the value of its deposits, investments, or securities. As of June 30, 2018 and 2017, the bank balance of cash and cash equivalents on deposit with SCERS' custodian bank and financial institutions totaled $8,404 and $18,243, respectively, of which $6,419 and $15,523 were not insured by Federal Depository Insurance Corporation (FDIC) and were exposed to custodial credit risk. The System believes that the risk is not significant because the cash is held with major financial institutions.

As of June 30, 2018 and 2017, deposits held in the System's name for the margin accounts of $0 and $12,372, respectively, were not insured or not collateralized, and these deposits were exposed to custodial credit risk.

As of June 30, 2018 and 2017, 100% of the System's investments held with the custodian were held in the System's name, and the System is not exposed to custodial credit risk related to these investments. There are no general policies relating to custodial credit risk.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The investment guidelines negotiated with the actively-managed external portfolio managers give the managers the discretion to deviate within +/-20% and +/-30%, for strategies 1 and 2, respectively, from the effective duration of the relevant Barclays Capital Aggregate benchmark based on the portfolio total.

Foreign currency is comprised of international investment proceeds and income to be repatriated into U.S. dollars and funds available to purchase international securities. The System does not have a foreign currency risk policy.

(Dollar Amounts Expressed in Thousands)

SECTION 5: HIGHLY SENSITIVE INVESTMENTS

As of June 30, 2018 and 2017, SCERS' investments included Collateralized Mortgage Obligations and Mortgage Pass-Through securities totaling $290,850 and $367,695, respectively. These securities are highly sensitive to interest rate fluctuations in that they are subject to early payment in a period of declining interest rates. The resulting reduction in expected total cash flows affects the fair value of these securities.

The System's investment policy allows investments in commodities and futures. SCERS' investments include a target allocation of 2% of total fund assets in commodities and commodity futures as part of the Real Assets asset class. Commodities are part of the real asset class that produce a different pattern of returns compared to other investments. Unique supply and demand factors and the way commodities are traded are the main reasons for the low correlation between commodities and stocks and bonds. Not only is correlation low with traditional asset classes in general, but importantly, commodities often perform well when stocks and bond prices fall.

Spot commodity prices have historically been a poor investment and have declined in real terms. However, investment in collateralized commodity futures can provide higher returns. The futures market is an efficient way for producers to hedge price risk by forward-selling commodities at lower prices relative to spot prices to investors and speculators generating a roll yield (backwardation).

In general, commodities are volatile investments that are prone to large price spikes. By investing in commodity futures, investors get exposure to short-term price movement and risk, as well as long-term price trends. This price volatility and the need for producers to hedge their production provides the fundamental rationale for why investment managers pay the risk premium to speculators and long-only investors in the commodity markets.

As of June 30, 2018 and 2017, total commodities investments were $51,180 and $113,849, respectively. The investments consist of commodity futures hedge fund-of-funds, a commodity index fund, a commodity futures strategic fund, and partial exposure through a customized, diversified real assets strategy.

Derivatives

The System's investment portfolios contain individual securities as well as investments in external investment pools. The System's investment policy allows investment managers to use derivative instruments for certain purposes and within certain parameters. Such instruments include futures contracts, currency forward contracts, option contracts, swap agreements, rights and warrants. The System permits the use of derivatives to minimize the exposure of certain investments to adverse fluctuations in financial and currency markets, as an alternative to investments in the cash market in which the manager is permitted to invest, and as an additional yield curve and/or duration management strategy. The System does not permit the use of derivatives for speculative use or to create leverage, however, this does not apply to investments in external pools. As of June 30, 2018 and 2017, the derivative instruments held by the System are considered investments and not hedges for accounting purposes. The gains and losses arising from this activity are recognized as incurred in the Statements of Changes in Fiduciary Net Position.

(Dollar Amounts Expressed in Thousands)

The tables below present the related net appreciation/(depreciation) in fair value, the fair value and the notional value of derivative instruments outstanding at June 30, 2018 and 2017:

June 30, 2018

Investment Derivatives Instruments	Net Appreciation/ (Depreciation) in Fair Value of Investments	Financial Statement Classification	Fair Value	Notional
Forwards	$(2,344)	Investment Sales and Other	$917	$201,858
Futures (Domestic and Foreign)	4,829	Investment Sales and Other	-	345,006
Options	(25)	Investment Sales and Other	43	(1,067)
Rights/Warrants	41	Investment Sales and Other	134	833 *
Swaps	4,438	Investment Sales and Other	5,193	691,295
Total Derivatives Instruments	**$6,939**		**$6,287**	

* Present in number of shares.

June 30, 2017

Investment Derivatives Instruments	Net Appreciation/ (Depreciation) in Fair Value of Investments	Financial Statement Classification	Fair Value	Notional
Forwards	$(3,992)	Investment Purchases and Other	$(1,167)	$138,038
Futures (Domestic and Foreign)	30,013	Investment Sales and Other	-	255,221
Options	(189)	Investment Sales and Other	159	(1,884)
Rights/Warrants	135	Investment Sales and Other	69	151 *
Swaps	45,795	Investment Sales and Other	1,650	1,293,709
Total Derivatives Instruments	**$71,762**		**$711**	

* Present in number of shares.

Futures contracts are financial instruments that derive their value from underlying indices or reference rates and are marked-to-market at the end of each trading day. Daily settlement of gains and losses occur on the following business day. As a result, the instruments themselves have no fair value at June 30, 2018 or 2017 or at the end of any trading day. Daily settlement of gains and losses is a risk control measure to limit counterparty credit risk. Futures variation margin amounts are settled each trading day and recognized in the financial statements under net appreciation/(depreciation) in fair value of investments as they are incurred.

Forward contracts are obligations to buy or sell a currency or other commodity at a specified exchange rate and quantity on a specific future date. The fair value of the foreign currency forwards is the unrealized gain or loss calculated based on the difference between the specified exchange rate and the closing exchange rate at June 30, 2018 and 2017.

(Dollar Amounts Expressed in Thousands)

Counterparty Credit Risk

Below is a schedule showing the counterparty credit ratings of the System's non-exchange traded investment derivative instruments outstanding and subject to loss at June 30, 2018 and 2017:

June 30, 2018

S&P Rating	Forwards	Swaps	Total
AA-	$801	$-	$801
A+	1,007	23	1,030
A	287	-	287
A-	-	1,441	1,441
BBB+	101	3,147	3,248
Investments in Asset Position	2,196	4,611	6,807
Investments in Liability Position	(1,279)	(1,149)	(2,428)
Total Investments in Asset/(Liability) Position	**$917**	**$3,462**	**$4,379**

June 30, 2017

S&P Rating	Forwards	Swaps	Total
AA-	$3	$-	$3
A+	1,127	68	1,195
A	13	-	13
A-	-	510	510
BBB+	-	1,328	1,328
Investments in Asset Position	1,143	1,906	3,049
Investments in Liability Position	(2,251)	(810)	(3,061)
Total Investments in Asset/(Liability) Position	**$(1,108)**	**$1,096**	**$(12)**

The System could be exposed to risk if the counterparties to derivative contracts are unable to meet the terms of the contracts. The System's investment managers seek to control this risk through counterparty credit evaluations and approvals, counterparty credit limits, and exposure monitoring procedures. The System anticipates that the counterparties will be able to satisfy their obligations under the contracts.

The aggregate fair value of investment derivative instruments in an asset position subject to counterparty risk at June 30, 2018 and 2017 were $6,807 and $3,049, respectively. This represents the maximum loss that would be recognized at the reporting date if all counterparties failed to perform as contracted. The System did not have any master netting agreements with its counterparties at June 30, 2018 and 2017, except that certain investment managers used netting arrangements at their discretion to minimize counterparty risks. The above schedules present exposure for similar instruments with the same counterparty on a net basis.

At June 30, 2018 and 2017, the System did not have any significant exposure to counterparty credit risk with any single party.

The System has investments in futures contracts. As indicated on the preceding pages, futures variation margin accounts are settled each trading day and recognized as realized gains/(losses) as they are incurred. As a result, the foreign futures contracts have no fair value at June 30, 2018 and 2017.

(Dollar Amounts Expressed in Thousands)

NOTE 4 – PENSION LIABILITY AND SIGNIFICANT ASSUMPTIONS

The employers' net pension liabilities (i.e. the total pension liability determined in accordance with GASB Statement No. 67 less the System's fiduciary net position) as of June 30, 2018 and 2017, are shown below:

	2018	2017
Total Pension Liability	$11,213,263	$10,680,998
Less: Fiduciary Net Position	9,251,937	8,584,225
Net Pension Liability	$1,961,326	$2,096,773
Fiduciary Net Position as a % of Total Pension Liability	82.5%	80.4%

The actuarial valuation of the System involves estimates of the amounts reported and assumptions about the probability of occurrence of events far into the future. Some examples include future salary increases and future employee mortality. The net pension liability is subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. Triennially, the System requests that its actuary, Segal Consulting, perform an analysis of the appropriateness of all economic and non-economic assumptions. The most recent triennial analysis was performed as of June 30, 2016, and as a result of that analysis, the Board of Retirement approved certain changes to the actuarial assumptions, which were incorporated in the actuarial valuation as of June 30, 2018 and 2017.

Disclosure of Information about Actuarial Methods and Assumptions

The required Schedule of Changes in Net Pension Liability and Related Ratios, immediately following the Notes to the Financial Statements, presents multi-year trend information about whether the employers' net pension liability is increasing or decreasing over time.

The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations.

Actuarial Methods and Assumptions:

The following significant actuarial assumptions were used to measure the total pension liabilities as of June 30, 2018 and 2017:

Discount Rate:	7.00%
Inflation rate:	3.00%
Real across-the-board salary increase:	0.25%
Miscellaneous projected salary increases*:	4.50% to 8.25%
Safety projected salary increases*:	5.25% to 10.75%

(Dollar Amounts Expressed in Thousands)

Actuarial Methods and Assumptions (Continued):

Assumed post-retirement benefit increase:	Miscellaneous Tier 1	3.00%
	Miscellaneous Tier 2	0.00%
	Miscellaneous Tier 3	2.00%
	Miscellaneous Tier 4	2.00%
	Miscellaneous Tier 5	2.00%
	Safety Tier 1	3.00%
	Safety Tier 2	2.00%
	Safety Tier 3	2.00%
	Safety Tier 4	2.00%

Post-Retirement Mortality:

a) Service

For Miscellaneous Members and Beneficiaries -
Headcount-Weighted RP-2014 Healthy Annuitant Mortality Table projected generationally with the two-dimensional scale MP-2016 set forward one year for males and no age adjustment for females.

For Safety Members -
Headcount-Weighted RP-2014 Healthy Annuitant Mortality Table projected generationally with the two-dimensional scale MP-2016 set back four years for males and females.

b) Disability

For Miscellaneous Members -
Headcount-Weighted RP-2014 Healthy Annuitant Mortality Table projected generationally with the two-dimensional scale MP-2016 set forward seven years for males and set forward eight years for females.

For Safety Members -
Headcount-Weighted RP-2014 Healthy Annuitant Mortality Table projected generationally with the two-dimensional scale MP-2016 set forward four years for males and females.

c) Employee Contribution Rate

For Miscellaneous Members -
Headcount-Weighted RP-2014 Healthy Annuitant Mortality Table projected 20 years with the two-dimensional scale MP-2016 set forward one year for males and no age adjustment for females, weighted 40% male and 60% female.

For Safety Members -
Headcount-Weighted RP-2014 Healthy Annuitant Mortality Table projected generationally with the two-dimensional scale MP-2016 set back four years for males and females, weighted 75% male and 25% female.

(Dollar Amounts Expressed in Thousands)

Actuarial Methods and Assumptions (Continued):

Pre-Retirement Mortality:	Based upon the June 30, 2016 Actuarial Experience Study
Other Assumptions:	Analysis of actuarial experience study for the period July 1, 2013 through June 30, 2016

*Includes inflation at 3.00% plus real across-the-board salary increase of 0.25% plus merit and longevity increases.

Assumed Asset Allocation

The long-term expected rate of return on pension plan investments was determined using a building-block method in which expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and projected arithmetic real rates of return for each major asset class, used in the derivation of the long-term expected investment rate of return assumption, as of June 30, 2018 and 2017 are summarized in the table below:

Asset Class	Target Allocation	Real Rate of Return	Long-Term Expected Portfolio Rate of Return
U.S. large cap equity	17.0%	3.80%	5.61%
U.S. small cap equity	4.0	4.90	6.37
International developed equity	16.0	9.20	6.96
Emerging markets equity	4.0	9.70	9.28
High yield bonds	1.0	3.10	3.65
Bank loans	1.0	3.00	2.96
Growth oriented absolute return	3.0	4.97	4.97
Private equity	9.0	8.70	8.70
Private credit/private debt	4.0	5.10	5.10
Core/core plus bonds	10.0	1.40	1.06
Global bonds	3.0	0.20	0.07
U.S. treasury	5.0	0.60	0.16
Diversifying absolute return	7.0	3.04	3.04
Real estate	7.0	3.00	4.37
Real assets	7.0	7.74	7.74
Commodities	2.0	3.40	3.76
Total portfolio	100.0%	5.11%	5.15%
Inflation			3.00
Investment expense adjustment			(0.65)
Risk adjustment			(0.50)
Total long-term expected rate of return			7.00%

(Dollar Amounts Expressed in Thousands)

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The discount rates used to measure the total pension liability was 7.00% as of June 30, 2018 and 2017. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made based on the current contribution rate and that employer contributions will be made at the end of each pay period based on the actuarially determined contribution rates. For this purpose, only the employer contributions that are intended to fund benefits for current plan members and their beneficiaries are included. Projected employer contributions that are intended to fund the service cost for future plan members and their beneficiaries, as well as projected contributions from future plan members, are not included.

Based on those assumptions, the System's fiduciary net position was projected to be available to make all the projected future benefit payments for current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

In accordance with GASB Statement No. 67 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the employers' net pension liabilities as of June 30, 2018 and 2017, calculated using the discount rate, as well as what the employers' net pension liability would be if it were calculated using a discount rate that is 1.00% lower or 1.00% higher than the current rate.

	1% Decrease 6.0%	Current Discount Rate 7.0%	1% Increase 8.0%
Net pension liability as of June 30, 2018	$3,531,085	$1,961,326	$679,078
Net pension liability as of June 30, 2017	$3,611,235	$2,096,773	$860,712

NOTE 5 - CONTRIBUTIONS REQUIRED AND CONTRIBUTIONS MADE

Contributions to the plan are made pursuant to Section 31584 of the 1937 Act. The System's funding policy provides for periodic contributions at actuarially-determined rates that, expressed as percentages of annual covered payroll, are sufficient to accumulate adequate assets to pay benefits when due. Members of the System are required to contribute, and such contributions range from 3.54% to 22.13% of annual covered salary for fiscal year 2017-18 and from 2.30% to 21.86% of annual covered salary for fiscal year 2016-17 depending on the member's tier, employer, and bargaining unit. Each employer of the System is obligated by state law to make all required contributions to the plan and depending on the participating employer and their employees' tiers, such contribution rates range from 7.93% to 41.30% of covered payroll for fiscal year 2017-18 and from 13.18% to 41.93% of covered payroll for fiscal year 2016-17. The required contributions include current service cost and amortization of any unfunded prior service cost as of June 30, 2012 over a period of 23 years from June 30, 2012, amortization of any unfunded service costs resulting in actuarial gains or losses and amortization of any unfunded service costs resulting from changes in actuarial assumptions and methods over a 20-year period, amortization of any unfunded service costs resulting from plan amendments over a 15 year period and amortization of any unfunded service costs resulting from retirement incentive programs over a period of up to 5 years.

(Dollar Amounts Expressed in Thousands)

Employer contribution rates are determined using the entry age normal cost method based on a level percentage of payroll. The System also uses this actuarial method to amortize the unfunded liability, if applicable. Employee and employer contributions for the years ended June 30, 2018 and 2017 totaled $301,537 and $293,417, respectively. Included in this total are employer contributions of $201,631 and $203,928 in fiscal years 2017-18 and 2016-17, respectively, of which $181,626 and $184,608 were made by the County of Sacramento. Member contributions were $99,906 and $89,489 in fiscal years 2017-18 and 2016-17, respectively. All contributions were made in accordance with actuarially-determined contribution requirements based on the actuarial valuations performed as of June 30, 2016 and 2015, respectively.

NOTE 6 – RESERVES

Member and employer contributions are allocated to various legally required reserve accounts based on actuarial determinations. Descriptions of the purpose for the reserve and designated accounts are provided below.

Employee reserves represent the balance of member contributions. Additions include member contributions and interest earnings. Deductions include refunds of member contributions and transfers to retiree reserves.

Employer reserves represent the balance of employer contributions for future retirement payments to current active members. Additions include contributions from the employer and interest earnings. Deductions include transfers to retiree reserves, lump sum death benefits, and payments under California Government Code Sections 31725.5 and 31725.6 related to alternative employment for members otherwise entitled to disability retirement benefits.

Retiree reserves represent the balance of transfers from employee reserves, employer reserves, and interest earnings, less payments to retired members.

Retiree death benefit reserves represent the balance of funds for lump sum death benefits for retirees. Additions include interest earnings and, if necessary, employer contributions. Deductions include payments to beneficiaries of retired members who are deceased.

Contingency reserve was created to serve as a reserve against deficiencies in future earnings and unexpected expenses.

Investment gains and losses are recognized (smoothed) over a seven-year period. **Total allocated reserves and designations** represent the smoothed actuarial value of assets (the fair value of assets less the unrecognized/deferred gains and losses) and is the sum of the preceding reserves. As of June 30, 2018 and 2017, total allocated reserves were $9,123,004 and $8,665,226, respectively.

(Dollar Amounts Expressed in Thousands)

Market stabilization reserve represents the unrecognized/deferred gains and losses and is the difference between the smoothed actuarial value of assets and the net position restricted for pension benefits at fair value.

A summary of the various reserve accounts, which comprise net position restricted for pension benefits at June 30, 2018 and 2017, is as follows:

	2018	2017
Employee reserve	$843,780	$796,937
Employer reserve	2,826,540	2,800,542
Retiree reserve	5,358,078	5,004,343
Retiree death benefit reserve	17,095	16,552
Contingency reserve	77,511	46,852
Total allocated reserves and designations	9,123,004	8,665,226
Market stabilization reserve	128,933	(81,001)
Net position restricted for pension benefits	$9,251,937	$8,584,225

NOTE 7 - PLAN TERMINATION

SCERS is administered in accordance with the provisions of the 1937 Act found in the California Government Code at Section 31450 et seq. Once adopted by the governing body of a county, there are no provisions in the 1937 Act which permit the governing body of the county to terminate the plan. Section 31564 permits the governing body of a district to withdraw its employees if certain prerequisites are met. The governing body of a county or district can adopt optional provisions within the 1937 Act via ordinance or resolution. Once adopted, Section 31483 permits the governing body of a county or district to terminate the applicability of the optional provisions after a future date as specified in a subsequent ordinance or resolution.

NOTE 8 - RETIREE MEDICAL AND DENTAL INSURANCE PROGRAM

Plan Description

The Sacramento County Retiree Medical and Dental Insurance Program (the Program) is a multiple-employer medical and dental plan, which is sponsored and administered by the County of Sacramento and financed by three participating employers. SCERS' role in regard to the Program is limited to maintaining data provided by the administrator, collecting monies from the participating employers and remitting premium payments. The activities of the Program are accounted for in the agency fund. SCERS does not provide any funding for the Program.

Below is the list of employers participating in the Program as of June 30, 2018 and 2017:

- County of Sacramento
- Sacramento Metropolitan Fire District
- Sacramento Employment and Training Agency

The Program provides medical and/or dental subsidy/offset payments to eligible retirees. The Sacramento County Board of Supervisors, at its own discretion, sets the amount of subsidy/offset payment available to eligible County retirees on a year-to-year basis. The medical subsidy amounts for special districts' retirees are

(Dollar Amounts Expressed in Thousands)

varied and are established by each of the member districts. As of June 30, 2018, there were 287 annuitants receiving medical subsidy and 297 annuitants receiving dental subsidy. As of June 30, 2017, there were 273 annuitants receiving medical subsidy and 268 annuitants receiving dental subsidy.

Eligibility

County annuitants who retired after May 31, 2007 - According to the Program's Administrative Policy, only County annuitants from bargaining units 003, who retired after May 31, 2007, may be eligible for a premium subsidy/offset depending on the annuitant's credited service hours and type of retirement. For fiscal years ended June 30, 2018 and 2017, the monthly dental subsidy is $25, and the monthly medical subsidy amounts range from $122 to $244 depending on the annuitant's retirement date and years of service.

Special Districts' annuitants - The medical subsidy amounts for special districts' annuitants are varied and are established by each of the member districts. For fiscal years ended June 30, 2018 and 2017, the monthly medical subsidy amounts range from $72 to $343 and $72 to $361, respectively, depending on the annuitant's retirement date and years of service.

There are no vested benefits associated with the Program. The Program does not create any contractual, regulatory, or other vested entitlement to present or future retirees, their spouses, or dependents for medical and/or dental benefits, or subsidy/offset payments at any particular level, or at all. Sacramento County and other participating employers may, in their sole discretion, amend or terminate, in whole or in part, the Program by Resolution of the Board of Supervisors.

Contributions and Reserves

The System does not have any authority to establish or amend the obligations of the plan members and employers to contribute to the Program. SCERS does not determine the contribution rate or collect the required contributions from employers. SCERS' role in regards to the Program is limited to collecting monies from Sacramento County and paying the premiums when due. Monies received by the System in excess of liabilities to pay premiums are recognized as liabilities payable to the County. There are no net position or legally required reserve accounts for the Program.

Request for Information

Requests for additional financial information regarding the Program may be addressed to:

County of Sacramento, Department of Finance
Auditor-Controller Division
700 H Street, Room 3650
Sacramento, CA 95814

(Dollar Amounts Expressed in Thousands)

NOTE 9 – MORTGAGES PAYABLE

The System has real estate investments secured by long-term mortgage obligations which are not recourse loans against the System's assets. Activities related to such mortgages were as follows for the fiscal years ended June 30:

	2018	2017
Beginning Balance	$63,500	$63,500
Additions	-	-
Deductions	(13,500)	-
Ending Balance	$50,000	$63,500

Future debt service requirements for outstanding mortgages are as follows:

Year Ending June 30	Interest	Principal	Total
2019	$1,746	$ -	$1,746
2020	1,747	-	1,747
2021	930	39,000	39,930
2022	289	11,000	11,289
Total	$4,712	$50,000	$54,712

NOTE 10 – LEASE OBLIGATIONS

SCERS has commitments under operating lease agreements for office facilities and equipment. Minimum future rental payments as of June 30, 2018 were as follows:

Year Ending June 30:	
2019	$596
2020	600
2021	505
Total	$1,701

Rental costs during the fiscal years ended June 30, 2018 and 2017 were $590 and $593, respectively.

NOTE 11 – CONTINGENCIES

The System is involved in litigation relating to various matters. In the opinion of management, after consultation with legal counsel, the outcome of these matters is not expected to have a material adverse effect on the System's financial statements.

NOTE 12 - SUBSEQUENT EVENTS

On July 19, 2018, the System entered into an agreement with the Sacramento Metropolitan Fire District (SMFD), in which SMFD agreed to pay $45 million for the estimated unfunded actuarial accrued liability of retirees and vested members of the formerly Florin Fire Protection District. The payment terms are through fiscal year 2036-37 and at 7% annual interest rate.

(Dollar Amounts Expressed in Thousands)

NOTE 13 – FUTURE ACCOUNTING PRONOUNCEMENTS

In January 2018, GASB issued Statement No. 84, *Fiduciary Activities,* which establishes criteria for identifying and reporting fiduciary activities of all state and local governments. The requirements of this statement are effective for financial statements for periods beginning after December 15, 2018. Management is evaluating the requirements of this GASB Statement and its impact to SCERS' financial reporting and will implement it in the financial statements for the fiscal year ending June 30, 2020.

In June 2018, GASB issued Statement No. 87, *Leases,* which establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. This statement improves accounting and financial reporting for leases by governments by requiring recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. The requirements of this statement are effective for financial statements for periods beginning after December 15, 2019. Management is evaluating the requirements of this GASB Statement and its impact to SCERS' financial reporting and will implement it in the financial statements for the fiscal year ending June 30, 2021.

SCHEDULE OF CHANGES IN NET PENSION LIABILITY AND RELATED RATIOS

FOR THE FISCAL YEARS ENDED JUNE 30

(Dollar Amounts Expressed in Thousands)

	2018	2017	2016	2015	2014	2013

* The pension liability is not available for years prior to June 30, 2013. Information will be presented in future years as it becomes available.

SCHEDULE OF EMPLOYER CONTRIBUTIONS

FOR THE LAST TEN FISCAL YEARS ENDED JUNE 30

(Dollar Amounts Expressed In Thousands)

	2018	2017	2016	2015	2014
Actuarially determined contribution (ADC)	$198,331	$201,928	$207,884	$221,823	$209,367
Contributions in relation to the ADC	198,331	201,928	207,884	221,823	209,367
Contribution deficiency (excess)	$-	$-	$-	$-	$-
Covered payroll*	$985,375	$958,934	$912,421	$873,328	$858,343
Contributions in relation to the ADC as a percentage of covered payroll	20.1%	21.1%	22.8%	25.4%	24.4%

	2013	2012	2011	2010	2009
Actuarially determined contribution (ADC)	$188,529	$179,099	$182,921	$167,142	$177,011
Contributions in relation to the ADC	188,529	179,099	182,921	167,142	177,011
Contribution deficiency (excess)	$-	$-	$-	$-	$-
Covered payroll*	$858,551	$835,737	$818,804	$872,804	$923,375
Contributions in relation to the ADC as a percentage of covered payroll	22.0%	21.4%	22.3%	19.2%	19.2%

* Payroll for the years ending 2009 through 2012 are calculated by dividing the contribution dollar amount by the aggregated contribution rate.

SCHEDULE OF ANNUAL MONEY-WEIGHTED RATE OF RETURN

FOR THE FISCAL YEARS ENDED JUNE 30

	2018	2017	2016	2015	2014
Annual money-weighted rate of return, net of investment expenses*	9.81%	13.57%	-0.97%	2.01%	16.18%

* Information prior to June 30, 2014 is not available. Information will be presented in future years as it becomes available.

The schedules presented in the Required Supplementary Information provide information to help promote an understanding of the employers' net pension liability over time on a market value of assets basis. The Schedule of Changes in Net Pension Liability and Related Ratios includes historical trend information about the System's total pension liability and the progress made in accumulating sufficient assets to pay benefits when due.

The Schedule of Employer Contributions presents historical trend information about the actuarially determined contribution and the actual contributions made. The Schedule of Annual Money-Weighted Rate of Return presents investment performance, net of pension plan investment expense, adjusted for the changing amounts actually invested.

CHANGE OF ASSUMPTIONS

Triennially, the System requests that its actuary perform an analysis of the appropriateness of all economic and non-economic assumptions. The most recent triennial analysis was performed as of June 30, 2016. As a result of that analysis, the Board of Retirement approved the following changes to the actuarial assumptions, which were first incorporated in the June 30, 2017 valuation, and was used to determine the ADC effective in fiscal year 2018-19:

- The inflation rate was reduced from 3.25% to 3.0% to reflect the gradual decline of average inflation rates over the last several years.
- The investment rate of return was reduced from 7.50% to 7.00% to reflect the projected real rate of return for the next 10-15 years based on SCERS' asset allocation model and risk tolerance.
- The salary increase assumption was adjusted slightly to reflect past experience.
- The retirement rates were adjusted to be more in line with the experience.
- The mortality rates were adjusted and a generational approach was used to reflect a slight mortality improvement.
- Termination rates were adjusted to reflect lower incidence of termination, with a lower proportion electing to receive a deferred vested benefit.
- The disability rates were adjusted to reflect slightly lower incidence of disability for Miscellaneous and Safety members.
- An assumption was introduced for new Miscellaneous disabled retirees to anticipate conversions of unused sick leave at retirement.

METHODS AND ASSUMPTIONS USED TO ESTABLISH ACTUARIALLY DETERMINED CONTRIBUTION RATES

The following actuarial methods and assumptions were used to determine contribution rates reported in the Schedule of Employer Contributions:

Valuation date:	Actuarially determined contribution rates are calculated as of June 30, two years prior to the end of the fiscal year in which contributions are reported.
Actuarial cost method:	Entry Age Cost Method
Amortization method:	Level percent of payroll (3.50% payroll growth assumed)
Remaining amortization period:	Effective with the June 30, 2013 valuation, the System's remaining outstanding balance of the June 30, 2012 Unfunded Actuarial Accrued Liability (UAAL) is being

	amortized over a declining 23-year period (20 years as of June 30, 2015). The UAAL established as a result of the Early Retirement Incentive Program for LEMA members is amortized over a 10-year period beginning June 30, 2010. The change in UAAL that arises due to actuarial gains or losses or from changes in actuarial assumptions or methods at each valuation is amortized over its own declining 20- year period. Any change in UAAL that arises due to plan amendments will be amortized over its own declining 15-year period and any change in UAAL due to retirement incentive programs will be amortized over its own declining period of up to 5 years.
Asset valuation method:	The market value of assets less unrecognized returns in each of the last six years. Unrecognized return is equal to the difference between actual and expected returns on a market value basis and is recognized over a rolling seven-year period. The deferred return is further adjusted, if necessary, so that the actuarial value of assets will stay within 30% of the market value of assets. Deferred gains and losses as of June 30, 2013 have been combined and will be recognized in equal amounts over a six-year period starting July 1, 2013.
Actuarial assumptions:	
Investment rate of return:	7.50%, net of pension plan investment expense, including inflation
Inflation rate:	3.25%
Projected salary increases:	4.50% - 11.50% varying by service, including inflation
Assumed post-retirement benefit increase:	Miscellaneous Tier 1 3.25% Miscellaneous Tier 2 0.00% Miscellaneous Tier 3 2.00% Miscellaneous Tier 4 2.00% Miscellaneous Tier 5 2.00% Safety Tier 1 3.25% Safety Tier 2 2.00% Safety Tier 3 2.00% Safety Tier 4 2.00%
Other assumptions:	Same as those used in June 30, 2015 funding actuarial valuation.
Other information:	All members with membership dates on or after January 1, 2013 enter the new tiers created by the California Public Employees' Pension Reform Act of 2013 (PEPRA).

Changes in Methods and Assumptions Used to Determine the ADC

Valuation date as of June 30:

2007
- Investment return assumption increased from 7.75% to 7.875%.
- Salary increase assumption increased from 5.45% to 5.65%.

2010
- Investment return assumption decreased from 7.875% to 7.75%.

2011
- Modification in non-economic assumptions.
- Investment return assumption decreased from 7.75% to 7.50%;

2012
- Inflation assumption decreased from 3.50% to 3.25%;
- Salary increase assumption decreased from 5.65% to 5.40%;
- Cost-of-living adjustment increase assumption for Tier 1 decrease from 3.40% to 3.25%.

2013
- Actuarial cost method changed from Aggregate Entry Age Normal Cost Method to Individual Entry Age Normal Cost Method.
- Changes to the amortization periods used for various future changes in liability:
- UAAL established as a result of Early Retirement Incentive Program for Sacramento County Law Enforcement Managers Association (LEMA) is amortized over a 10- year period beginning June 30, 2010;
- UAAL as a result of actuarial gains or losses as of June 30 will be amortized over a 20-year period;
- UAAL as a result of changes in actuarial assumptions or methods to be amortized over a 20-year period;
- Change in UAAL as a result of plan amendments to be amortized over a 15-year period;
- UAAL as a result from retirement incentive programs will be amortized over a period up to 5 years.
- The retirement rates were adjusted to reflect slightly later retirements.

2014
- The mortality rates were adjusted to reflect a slight mortality improvement.
- Termination rates were adjusted to reflect lower incidence of termination, with a higher proportion electing to receive a deferred vested benefit.
- Years of service instead of age was used in determining and applying the merit and promotional rates of salary increase.

Schedule of administrative expenses:

Type of expense:	2018	2017
Salaries and benefits	$4,078	$3,984
Professional fees	981	1,149
Rent and lease expense	557	488
Depreciation expense	27	27

SECTION 3

INVESTMENT

Introduction

For the fiscal year ended June 30, 2018, the Sacramento County Employees' Retirement System (SCERS) generated a strong 10.1% gross return. The returns added to the solid returns generated during the prior fiscal year. While valuations continue to increase across most market segments, and market volatility increased during the second half of the fiscal year, asset prices were up during the year, with the strongest returns coming from the Private Equity, Real Assets, and Domestic Equity asset classes.

SCERS' gross return of 10.1% was also impressive on a relative basis, exceeding its policy index return of 8.2%, by 1.9%. Key contributors to the generation of excess returns relative to SCERS' policy index were the Domestic and International Equity, Private Equity, Real Estate, and Real Assets asset classes. Assets under management ended the current fiscal year at $9.4 billion, which is a historical peak level for SCERS, and ahead of the prior fiscal year's assets of $8.7 billion.

SCERS' general investment consultant, Verus Advisory (Verus), prepared the investment returns cited in this transmittal using information it receives from SCERS' custodian bank and investment managers.

Market Overview

While global financial market returns were strong overall for the 2017-18 fiscal year, the year is best described as a tale of two halves. During the first half of the fiscal year (second half of calendar year 2017), returns were very strong, fueled by synchronized and accelerating global growth for the first time since before the Global Financial Crisis (GFC), strong employment, and stable inflation. The signing of a comprehensive U.S. tax reform bill in December of 2017, and the substantial cut in the corporate tax rate within the bill, served as a stimulus for equity markets. Market volatility levels were at all-time lows as the 2017 calendar year ended. The second half of the fiscal year (first six months of calendar year 2018), was a different story, with several spikes in market volatility that resulted in equity and bond markets being flat to down. Mounting trade concerns with China and other global economies drove volatility, as well as investors moved toward the U.S. dollar, which is considered a safe-haven asset during periods of global volatility. Overall, global financial market returns were mixed during the 2017-18 fiscal year, with global equities generating strong returns, and fixed income markets generating muted returns. During the first half of fiscal year 2018-19, volatility has picked up and global financial markets have generated negative returns.

Major global market returns for the 2017-18 fiscal year were as follows: Domestic equity markets (Russell 3000 Index) returned 14.8%; International developed equity markets (MSCI EAFE Index) returned 6.8%; Emerging equity markets (MSCI Emerging Markets Index) returned 8.6%; Fixed income markets (Bloomberg Barclays Aggregate Index) returned -0.4%; Real estate markets (NFI-ODCE Index) returned 8.4%; Absolute return markets (HFRI Fund of Funds Composite Index) returned 5.1%; and Commodities markets (Bloomberg Commodity Index) returned 7.3%.

While all segments of equities generated positive returns during the fiscal year, there were divergences. Within the U.S., small capitalization stocks at 17.6% (Russell 2000 Index) outperformed large capitalization stocks at 14.5% (Russell 1000 Index), and growth stocks at 22.5% (Russell 1000 Growth Index) significantly outperformed value stocks at 6.8% (Russel 1000 Value Index). The underperformance in value versus growth has been a multi-year trend since the GFC, driven by earnings differentials between technology stocks, which are heavily weighted in the growth index, and financials, which are heavily weighted in the value index. In addition, growth tends to outperform value later in an economic cycle, which is where we are now. International equity stocks delivered positive, but lagged returns versus domestic equity stocks. Earnings within non-U.S. markets have been strong; however, prices have been range bound, which has led to price earnings (P/E) multiple compression. Underperforming currencies versus the U.S. dollar have significantly impacted unhedged international equities, particularly those in emerging markets. Emerging markets equities were down over 8% in the last quarter of the fiscal year, off meaningful valuation changes and a strong U.S. dollar, even though earning fundamentals remain strong. While the emerging markets equities have underperformed developed markets, growth trends remain strong, and stock and currency valuations are attractive. Valuations across international developed and emerging markets equities are low relative to U.S. equities. The P/E multiple for domestic equities stood at 20.9 as of June 30, 2018, versus 15.7 and 14.0 for international developed and emerging markets equities, respectively.

Fixed income markets were weak during the fiscal year. Treasuries generated returns of -2.1% (as reflected by the Bloomberg Barclays 10-Year U.S. Treasury Index), impacted by rising interest rates. Treasuries also experienced yield curve flattening, where the spread between short-term yields and longer-term yields tightened. As of June 30, 2018, the 2-year yield was at 2.52% versus the 10-year yield of 2.86% (yields have increased further above 3.0% for 10-Year Treasuries early in the 2018-19 fiscal year). Historically, a flattening U.S. yield curve, and inversion (short-dated yields higher than long-dated yields), has been a late cycle indicator toward the potential of an upcoming recession. Credit results were mixed as investment grade credit returned -0.6% (Bloomberg Barclays U.S. Investment Grade Credit Index), while high yield credit generated positive returns of 2.6% (Bloomberg Barclays U.S. Corporate High Yield Index). Yields for both indexes widened during the fiscal year, but remain well below long-term historical averages. The broad based Bloomberg Barclays Aggregate index, which contains an equal mix of Treasuries, agency mortgages, and investment grade credit, was for the most part flat at -0.4% during the fiscal year. Commodities were strong during the fiscal year, returning 7.3%, fueled by strong oil fundamentals and pricing.

Economic activity and data remains strong in the U.S. and across the globe. Calendar year 2017 saw most major economies experiencing accelerating growth for the first time since before the GFC. However, calendar year 2018 is demonstrating some subtle differences in growth rates across global economies, though growth remains positive. The U.S. economy is growing at 2.8% (as of 3/31/18), with inflation at 2.3% (as of 6/30/18), up from 2.0% and 1.7% respectively, the year prior. Unemployment in the U.S. remains very low at 4.0% (as of 6/30/18), down from 4.3% the year prior, and consumer sentiment remains above long-term historical averages. With the stable economic backdrop, the Federal Reserve (the Fed), raised interest rates three times during the fiscal year, with a target rate of 1.8% to 2.0% as of June 30, 2018. The Fed has since raised rates further in fiscal year 2018-19. With the U.S. economy on stable footing, the Fed has signaled consistent increases in interest rates, with a more than likely forward emphasis on protecting against rising inflation over fueling economic growth and employment.

Outside of the U.S., the euro zone economy is growing at 2.5% (as of 3/31/18), with 2.0% inflation (as of 6/30/18). However, unemployment of 8.6% (as of 3/31/18) remains higher than the U.S., particularly in the peripheral euro zone economies. While the Fed already ended quantitative easing and its bond purchasing program, the European Central Bank (ECB) is considered to be earlier in the economic cycle than the U.S., and just announced in June the end of Europe's bond buying program, with asset purchases scheduled to end in December of 2018. The ECB has not yet raised interest rates, as the Fed has. Japan is only growing at 1.1% (as of 3/31/18), with inflation of 0.7% (as of 5/31/18), and has left low interest rates and quantitative easing programs in place. China is growing at 6.8% as of (3/31/18).

Markets have consistently generated strong returns since the end of the GFC in 2009; however, investor concerns appear to be increasing, which has resulted in a changing market dynamic in calendar year 2018.

There has been a significant pickup in market volatility, which has resulted in several periods of dramatic selling in the equity markets. Bond markets have not proved to be an anchor to safety during these periods, as they traditionally are, given the rising interest rate environment. This makes it increasingly challenging to find attractive areas to earn returns, especially since most markets are priced to perfection, with valuations near or above historic levels. SCERS' strategic asset allocation is structured to provide greater levels of diversification across economic environments and risk factors, outside of equities and bonds, which should serve SCERS well if the experiences of 2018 persist going forward.

Asset Allocation

SCERS' investment program is structured around a strategic asset allocation model established by SCERS' Board with the assistance of SCERS' investment staff, general investment consultant Verus, alternative assets consultant Cliffwater LLC (Cliffwater), and real estate consultant The Townsend Group (Townsend). The objective of the asset allocation model is to ensure the diversification of investments in a manner that generates a desired rate of investment return with an acceptable level of investment risk. To achieve this, the asset allocation is broadly diversified across asset categories, asset classes, and within asset classes to provide consistent long-term performance. The asset allocation targets are not tactical, but rather, are long term in nature, consistent with the long-term nature of SCERS' benefit obligations. The asset allocation model is typically reviewed every three to five years, but the long-term capital market assumptions for the various asset classes and sub-asset classes are reviewed and adjusted as appropriate each year. Research has shown that the asset allocation mix is the largest driver of investment performance.

The current strategic asset allocation model was established as a result of an asset allocation study conducted in the 2016-17 fiscal year. During the study, SCERS' Board identified and prioritized several investment-related plan objectives, principles, and risks that played a role in the design of the strategic asset allocation. These included: (1) reducing portfolio volatility; (2) improving the funding status of the plan; (3) protecting against significant drawdowns; (4) improving the cash flow generation of the portfolio; and (5) determining a reasonable and realistic expected investment return for the portfolio.

SCERS' strategic asset allocation views risk exposures through multiple lenses, including functional and common factor exposures, in order to manage and maintain allocations that are aligned with SCERS' investment philosophy and objectives. This multiple lens approach uses a functional framework to group and classify segments of SCERS' portfolio in order to link segments that are exposed to similar economic environments and risk factors, and which would be expected to have similar roles and outcomes in a portfolio. The functional grouping takes a simplified approach at the asset category level, by breaking the portfolio into three asset categories, with greater complexity reserved at the asset class level. The asset categories include: (1) Growth; (2) Diversifying; and (3) Real Return.

The Growth asset category includes those segments of the portfolio that tend to perform best in a high growth and low/moderate inflationary environment, including most equity and credit investments. In contrast, they tend to perform poorly during recessionary periods, when GDP growth is contracting, or during certain periods when unexpected inflation arises. Growth assets tend to comprise the dominant allocation within most institutional investment portfolios, including that of SCERS. The Diversifying asset category includes those segments of the portfolio, which are expected to protect capital and perform better than the Growth asset category during dislocated and stressed market environments, including traditional fixed income and diversifying absolute return strategies. The Real Return asset category includes those segments of the portfolio that protect against inflation, generate cash flow, and provide further portfolio diversification, including real estate, infrastructure, energy, agriculture, and commodities investments.

SCERS' strategic asset allocation is summarized in the table below:

Asset Category/Asset Class	Target Allocation
Growth	**59.0%**
Domestic Equity	21.0
International Equity	20.0
Private Equity	9.0
Public Credit	2.0
Private Credit	4.0
Growth Absolute Return	3.0
Diversifying	**25.0**
Core/Core Plus Fixed Income	10.0
US Treasury	5.0
Global Fixed Income	3.0
Diversifying Absolute Return	7.0
Real Return	**16.0**
Real Estate	7.0
Real Assets	7.0
Commodities	2.0
Opportunities	**0.0**
	100.0%

SCERS' strategic asset allocation is a more risk balanced portfolio than the prior policy portfolio with a similar expected return profile, but with lower expected volatility (standard deviation), and a narrower range of potential outcomes, making it less susceptible to negative returns during down markets. It also increases diversification, especially to investment strategies with low and negative correlations to equity markets, and is expected to generate a greater level of cash flow for SCERS' plan. The strategic asset allocation contains a meaningful allocation to higher returning, more diversified, and less liquid private market investments, so tracking SCERS' liquidity profile in order to maintain sufficient cash flows in order to meet benefit payment obligations is a key focus of the Board and SCERS' investment staff.

The process of transitioning SCERS' portfolio to the strategic asset allocation targets occurred during the fiscal year, with structural modifications to underlying asset classes and the adjustment of policy benchmarks, in addition to implementation across several asset classes. It is anticipated that it will require a few years to reach the target allocation levels within the alternative asset classes.

The performance summary section and other portions of the Chief Investment Officer's Report will highlight the performance of the major asset classes, and will highlight activity and exposures by major asset classes. As an example, Growth Absolute Return and Diversifying Absolute Return will be referenced within an aggregate Absolute Return portfolio. Likewise, Public Credit, Core Plus Fixed Income, U.S. Treasury, and Global Fixed Income will be referenced within an aggregate Fixed Income portfolio.

Investment Portfolio Implementation

In addition to providing assistance to the Board in establishing the strategic asset allocation model, SCERS' investment staff and consultants assist in developing investment policy statements; conduct searches for and recommend the selection of investment managers; monitor investment manager performance and compliance; advise on developments in the investment markets; and analyze and develop recommendations for possible tactical adjustments and new investment initiatives.

SCERS utilizes external investment managers to invest the System's assets. As of June 30, 2018, SCERS' assets were invested across: (1) Domestic Equity - eight separate account portfolios and one commingled fund; (2) International Equity - four separate account portfolios and three commingled fund partnerships; (3) Fixed Income - four separate account portfolios and one global fixed income fund; (4) Absolute Return – three fund-of-funds separate portfolios and eleven fund partnerships; (5) Private Equity - four FoF partnerships and forty fund partnerships; (6) Private Credit – one separate account portfolio and five fund partnerships; (7) Real Estate – two separate account portfolios, seven core real estate fund partnerships, six value-added real estate fund partnerships, and seven opportunistic real estate fund partnerships; (8) Real Assets – two separate account portfolios and fourteen fund partnerships; (9) Commodities - one commodity fund partnership; (10) Opportunities - one opportunistic credit fund partnership; and (11) a portfolio overlay program, including a real assets strategy commingled fund.

Portfolio activity during the fiscal year included the following:

- In Domestic Equity, SCERS restructured the portfolio to consolidate the manager lineup and reduce uncompensated risks. During the fiscal year, SCERS terminated a dedicated U.S. REIT mandate. The majority of implementation of the new Domestic Equity structure occurred at the start of the 2018-19 fiscal year. SCERS also approved the annual report and annual investment plan for the Domestic Equity asset class for calendar year 2018.
- In International Equity, SCERS restructured the portfolio to consolidate the manager lineup and reduce uncompensated risks. Implementation occurred during the 2017-18 fiscal year, with the termination of international REIT and emerging markets small cap equity mandates, and the rebalancing of the remaining international equity engagements. SCERS also approved the annual report and annual investment plan for the International Equity asset class for calendar year 2018.
- In Fixed Income, SCERS restructured the portfolio to separate pubic credit from public fixed income. SCERS added a dedicated U.S. Treasury allocation within the public fixed income segment, and engaged an existing investment manager to manage this mandate. SCERS also approved the annual report and annual investment plan for the Fixed Income portfolio for calendar year 2018.
- In Absolute Return, SCERS restructured the portfolio to separate growth absolute return from diversifying absolute return. During the fiscal year, SCERS restructured one of its FoF separate account mandates to allocate to diversifying absolute return strategies while SCERS' direct absolute return portfolio is built out. An engagement with an existing absolute return fund was terminated. SCERS also approved the annual report and annual investment plan for the Absolute Return portfolio for calendar year 2018.
- In Private Equity, SCERS continued implementation of the direct private equity investment platform, making five fund commitments during the fiscal year. SCERS also approved the annual report and annual investment plan for the Private Equity asset class for calendar year 2018.
- In Private Credit, SCERS continued implementation of the direct private credit investment platform, making three fund commitments during the fiscal year. SCERS also approved the initial annual investment plan for the Private Credit asset class for calendar year 2018.

- In Real Estate, SCERS initiated the implementation of the transition of SCERS' core separate account real estate properties in exchange for shares in an open-end core real estate commingled fund. SCERS also made one new fund commitment, and increased its commitment to two existing funds during the fiscal year. SCERS also approved the annual report and annual investment plan for the Real Estate asset class for calendar year 2018.
- In Real Assets, SCERS continued implementation of the direct real assets investment platform, making two new fund commitments and increasing an investment with an existing fund during the fiscal year. SCERS also approved the annual report and annual investment plan for the Real Assets asset class for calendar year 2018.
- In the Opportunities segment, no significant changes were made during the fiscal year.

Due to the longer investment period for private market commitments, the importance of maintaining vintage year diversification, and the objective of investing with top tier managers, it takes several years for target allocation levels to be reached in the Private Equity, Private Credit, and Real Assets asset classes.

SCERS' custodial bank is State Street Bank and Trust (State Street). In addition to asset custody services (including performance measurement), State Street provides securities lending services to SCERS and, through State Street Global Advisors and State Street Global Markets, administers a portfolio overlay program and a brokerage commission recapture program, respectively. The portfolio overlay program assures that SCERS' portfolio exposures are consistent with the strategic asset allocation targets through cost-effective rebalancing, using investment proxies to close gaps relative to target allocation levels and to eliminate 'cash drag'. For the fiscal year ended June 30, 2018, SCERS earned a net income of $1.9 million from securities lending and received commission recapture income of approximately $50,000.

SCERS' primary legal services regarding the investment program are provided by specialized outside legal counsel and fiduciary counsel.

During the fiscal year, investment educational sessions were provided to the Board by SCERS' staff, investment consultants, and various investment managers to assist the Board in making decisions regarding new asset classes and possible new investment mandates. The educational sessions included presentations regarding: (1) available structures for private credit; (2) alternative investment fund fee and expense disclosures required by CA state law; (3) SCERS' Real Assets investments in agriculture; (4) Markets in Financial Instruments Directive II (MiFID II); and (5) private credit investing.

SCERS Investment Objectives

SCERS' investment objectives are set forth in the Board's Master Investment Policy Statement (Investment Policy) and through customized investment policy statements for each asset class. The Investment Policy was recently restated by the SCERS Board.

At the highest level, SCERS' investment objectives are:

OVER-ARCHING PLAN OBJECTIVES:

- Provide for current and future benefit payments to plan participants and their beneficiaries, and sustain the plan over its useful life.
- Diversify plan assets as its main defense against large market drawdowns.
- Preserve a degree of liquidity ample to meet benefit payments and capital calls, without incurring substantial transaction costs or "fire sales" of illiquid holdings.
- Incur costs that are reasonable and consistent with industry standards.

- Achieve funding goals, including the maintenance of funded status and manageable, consistent contribution rates.
- Maintain risk exposure required to meet return requirements, while limiting drawdown exposure.

INVESTMENT PERFORMANCE OBJECTIVES:

- Generate returns in excess of policy benchmarks at the total fund and asset class levels over rolling three-year periods.
- Achieve real (after inflation) returns at the total fund level that are at or above the actuarial real return (assumed return less per capita pay growth) over complete market cycles.
- For asset classes and actively managed portfolios, achieve net returns that exceed policy benchmarks, and rank in the top half of a competitive, after-fee universe.

Proxy Voting Guidelines and Procedures

As a fiduciary, the Board has an obligation to manage SCERS' assets in the best interest of the plan participants. The Board retains third party services to provide guidance for voting proxies and acting on corporate actions, such as mergers and acquisitions. For the fiscal year ended June 30, 2018, a majority of proxies were voted through an electronic voting platform provided by Institutional Shareholder Services, with the assistance of research and analysis provided by Institutional Shareholder Services and Glass Lewis & Co.

Summary of Investment Results

SCERS monitors capital market investment returns through reference to recognized and easily obtainable market indices, which are used as asset class benchmarks. The benchmark index performance by asset class for one, three, and five years is shown on the Investment Results schedule. The performance of the asset categories is also provided; however, since these were implemented in 2017, performance goes back for only one year. The asset class benchmark returns are weighted by the asset allocation to provide a policy-weighted return based on SCERS' total fund. SCERS presents its returns using a time-weighted rate of return methodology based upon market values. SCERS' general investment consultant, Verus, prepared the investment returns cited in this section using information it received from SCERS' custodian bank and investment managers. The total fund performance is reported gross of fees; however, several underlying asset classes are net of fees, including Private Equity, Private Credit, Growth and Diversifying Absolute Return, and Real Assets.

SCERS' investment performance for the fiscal year ended June 30, 2018 was strong, with all major asset classes generating positive returns, except for the Opportunities portfolio. Private Equity, Real Assets, and Domestic Equity generated the strongest positive absolute returns.

For the period, SCERS' total fund return was 10.1%, gross of investment management fees, and 9.9%, net of investment management fees. The gross return for the fiscal year was 1.9% above SCERS' policy weighted benchmark return of 8.2%, and was well above the actuarial return objective of 7.0%. Over the trailing three-year period, SCERS' annualized investment return was 7.6% gross and 7.3% net. The three-year annualized return was above the actuarial return objective of 7.0%, and SCERS' policy benchmark return of 7.1%. Over the trailing five-year period, SCERS' annualized investment return was 8.3% gross and 8.0% net. The five-year annualized return was above the actuarial return objective of 7.0% and SCERS' policy benchmark return of 7.9%.

SCERS also assesses its investment performance relative to a peer group of other public funds utilizing a series of universe comparisons provided by Verus. For the fiscal year, the median public fund in the InvestorForce Universe of public funds with assets of greater than one billion dollars was 8.4%. SCERS' return of 10.1% ranked in the top 8th percentile.

Growth Asset Category

The Growth asset category is comprised of the following asset classes: Domestic Equity, International Equity, Private Equity, Public Credit, Private Credit, and Growth Absolute Return. The Growth asset category returned 12.9% for the fiscal year, gross of fees. The return was above the policy benchmark return of 11.1%, by 1.8%. The Growth asset category and benchmark return is a weighted average of the underlying asset class and benchmark returns, based on their weights within SCERS' strategic asset allocation.

Domestic Equity returned 15.2% for the fiscal year, gross of fees. The return was above the benchmark Russell 3000 Index return of 14.8%, by 0.4%. For the three-year period, SCERS' Domestic Equity annualized return was 11.6%, gross of fees, in-line with the Russell 3000 Index benchmark return of 11.6%. In the domestic equity segment of the InvestorForce Universe, SCERS ranked in the top 40th percentile for the fiscal year and in the top 36th percentile for the three-year period.

The Domestic Equity sub-asset allocation divides investments by stock market capitalization. The large cap domestic equity investments had a fiscal year 15.3% return, gross of fees, which was 0.8% above the return of the Russell 1000 Index benchmark of 14.5%. The annualized investment return for large cap equity for three years was 11.6%, gross of fees, which was in-line with the benchmark return of 11.6%. The one-year return for small cap equity investments was 20.7%, gross of fees. This return was better than the benchmark Russell 2000 Index return of 17.6%. For the three-year period, the small cap equity annualized return was 13.0%, gross of fees, which was 2.0% above the benchmark return of 11.0%.

International Equity returned 9.4% for the fiscal year, gross of fees. This was 1.6% above the benchmark MSCI ACWI ex-U.S. Index return of 7.8%. Annualized performance for the three-year period of 6.8%, gross of fees, was above the benchmark return of 5.6%. In the international equity segment of the InvestorForce Universe, SCERS ranked in the top 21st percentile for the fiscal year and in the top 23rd percentile for the three-year period.

SCERS' international equity investments are classified into two categories, developed markets and emerging markets, determined by country. For the fiscal year, SCERS' developed market investments returned 10.6%, gross of fees, which was 3.0% above the benchmark MSCI World ex-US Index return of 7.6%. Over the trailing three-year period, the developed markets annualized return was 7.7%, gross of fees, compared to the MSCI World ex-US Index return of 5.4%. For the fiscal year, the emerging markets gross of fees return of 5.3% was below the return of the benchmark MSCI Emerging Markets Index return of 8.6%. For the three-year period, SCERS' emerging markets annualized return of 4.2%, gross of fees, came in 1.8% below the benchmark return of 6.0%.

The Private Equity asset class generated a return of 21.3%, net of fees for the fiscal year, compared to the 14.4% return of the asset class benchmark, the Thomson Reuters C/A All Private Equity Index. For the three-year period, SCERS' Private Equity asset class returned 12.4%, compared to the benchmark return of 11.4%. Another longer-term comparison measure is the Russell 3000 Index plus 3%, which returned 16.8% and 13.2% for the fiscal year and three-year period, respectively. In the private equity segment of the InvestorForce Universe, SCERS' Private Equity return ranked in the top 5th percentile for the fiscal year and in the top 33rd percentile for the three-year period. Please note that the returns of the Private Equity asset class and benchmark are lagged one quarter.

SCERS' Public Credit portfolio generated a fiscal year 4.1% return, gross of fees, which was 0.5% above the custom benchmark return of 3.6% (comprised of 50% BofA Merrill Lynch U.S. HY Master II Index / 50% Credit Suisse Leveraged Loans Index). For the three-year period, the Public Credit portfolio annualized return was 5.9%, gross of fees, compared to the benchmark return of 5.0%.

The Private Credit asset class generated a return of 6.3%, net of fees for the fiscal year, compared to the 6.7% return of the asset class benchmark, the Credit Suisse Leveraged Loan Index plus 2%. For the three-year period, SCERS' Private Credit asset class returned 7.5%, compared to the benchmark return of 6.3%. Please note that the returns of the Private Credit asset class and benchmark are lagged one quarter.

SCERS' Growth Absolute Return investments generated a fiscal year 6.5% return, net of fees. For the three-year period, the Growth Absolute Return portfolio annualized return was 4.3%. The policy benchmark for the Growth Absolute Return investments is the HFRI FoF Composite Index plus 1%, which returned 6.2% and 5.6% in the fiscal year and three-year periods, respectively. Another comparison is the long-term performance objective measure of 91-day T-Bills plus 5%, which returned 6.4% and 5.7% for the fiscal year and three-year period, respectively.

Diversifying Asset Category

The Diversifying asset category is comprised of the following asset classes: Public Fixed Income (Core Plus Fixed Income, U.S. Treasury, Global Fixed Income) and Diversifying Absolute Return. The Diversifying asset category returned 0.8% for the fiscal year, gross of fees. The return was below the policy benchmark return of 1.0%, by 0.2%. The Diversifying asset category and benchmark return is a weighted average of the underlying asset class and benchmark returns, based on their weights within SCERS' strategic asset allocation.

SCERS' Core Plus Fixed Income investments generated a fiscal year 0.4% return, gross of fees, which was 0.8% above the benchmark Bloomberg Barclays Aggregate Index return of -0.4%. For the three-year period, the Core Plus Fixed Income portfolio annualized return was 2.6%, gross of fees, compared to the benchmark return of 1.7%.

SCERS' U.S. Treasury segment was created during the 2017-18 fiscal year, so there is not a full year of data to report a return. The benchmark for the U.S. Treasury segment is the Bloomberg U.S. Government Total Return Index.

SCERS' Global Fixed Income investments generated a fiscal year 0.0% return, gross of fees, which was below the custom benchmark return (comprised of 80% Citigroup WGBI Index / 20% JP Morgan GBI EM Diversified Index) of 1.1%. For the three-year period, the Global Fixed Income portfolio annualized return was 3.5%, gross of fees, compared to the benchmark return of 2.7%.

SCERS' Diversifying Absolute Return investments generated a fiscal year 1.8% return, net of fees. For the three-year period, the Diversifying Absolute Return portfolio annualized return was 1.0%. The policy benchmark for the Diversifying Absolute Return investments is the HFRI FoF Conservative Index, which returned 4.2% and 5.0% in the fiscal year and three-year periods, respectively. Another comparison is the long-term performance objective measure of 91-day T-Bills plus 2%, which returned 3.4% and 2.7% for the fiscal year and three-year period, respectively.

Real Return Asset Category

The Real Return asset category is comprised of the following asset classes: Real Estate, Real Assets, and Commodities. The Real Return asset category returned 12.6% for the fiscal year, gross of fees. The return was above the policy benchmark return of 9.1%, by 3.5%. The Real Return asset category and benchmark return is a weighted average of the underlying asset class and benchmark returns, based on their weights within SCERS' strategic asset allocation. The Real Return asset category return includes the SSGA Real Assets Strategy, which is the proxy used within SCERS' Overlay Program to replicate exposure while the asset class is implemented.

The Real Estate asset class generated a return of 14.9%, gross of fees for the fiscal year, compared to the 8.3% return of the custom asset class benchmark (65% NFI-ODCE / 35% NFI-ODCE plus 1%). For the three-year period, SCERS' Real Estate asset class returned 11.5%, compared to the benchmark return of 8.6%. In the real estate segment of the InvestorForce Universe, SCERS' Real Estate return ranked in the top 1st percentile for the fiscal year and three-year periods. Please note that the returns of some segments of the Real Estate asset class and benchmark are lagged one quarter.

The Real Assets asset class generated a return of 15.7%, net of fees for the fiscal year, compared to the 10.2% return of the asset class benchmark, (comprised of 45% Cambridge Associates Private Infrastructure Index / 35% Cambridge Associates Private Energy Index / 10% NCREIF Agriculture index / 10% NCREIF Timber Index). For the three-year period, SCERS' Real Assets asset class returned 16.5%, compared to the benchmark return of 7.6%. Another longer-term comparison measure is CPI-U (headline inflation) plus 5%, which returned 7.9% and 6.8% for the fiscal year and three-year period, respectively. Please note that the returns of the Real Assets asset class and benchmark are lagged one quarter.

SCERS' Commodities investments generated a fiscal year 3.7% return, gross of fees, which was below the benchmark Bloomberg Commodity Index return of 7.3%. For the three-year period, the Commodities portfolio annualized return was -6.3%, gross of fees, compared to the benchmark return of -4.5%.

Opportunities Portfolio

The Opportunities investments are tactical investments across SCERS' investible asset classes and universe. When an Opportunities investment is made, its capital is drawn from the asset class which best fits the risk and return characteristics of the underlying investments. The Opportunities portfolio only contains one investment as of June 30, 2018. For the fiscal year, SCERS' Opportunities investment achieved a -2.7% net return, which was 10.9% below SCERS' policy index 8.2% benchmark return. For the three-year period, SCERS' Opportunities portfolio returned 5.7%, compared to the benchmark return of 7.1%.

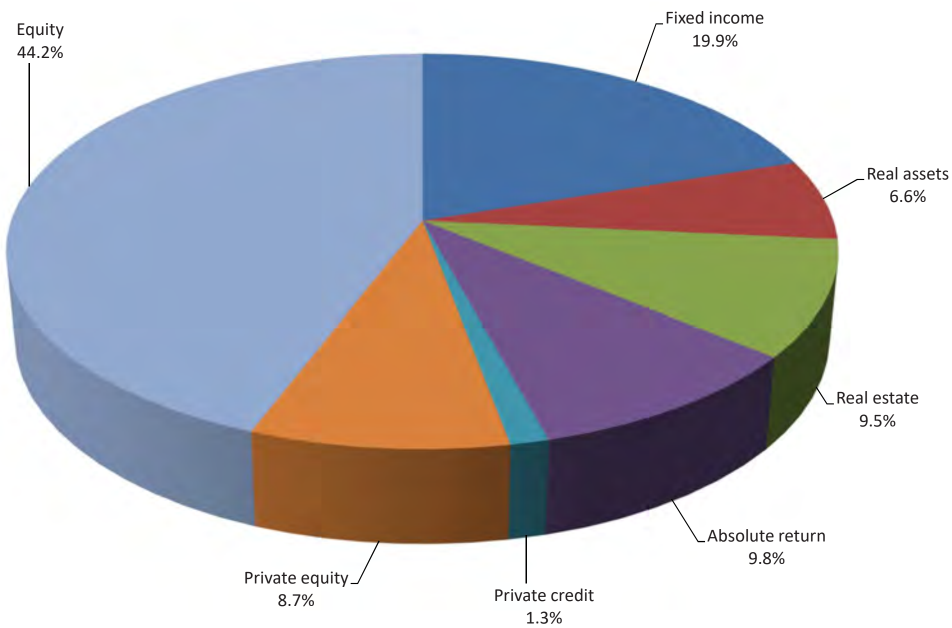
Additional information regarding SCERS' investment program can be found on the pages immediately following this report.

Respectfully submitted,

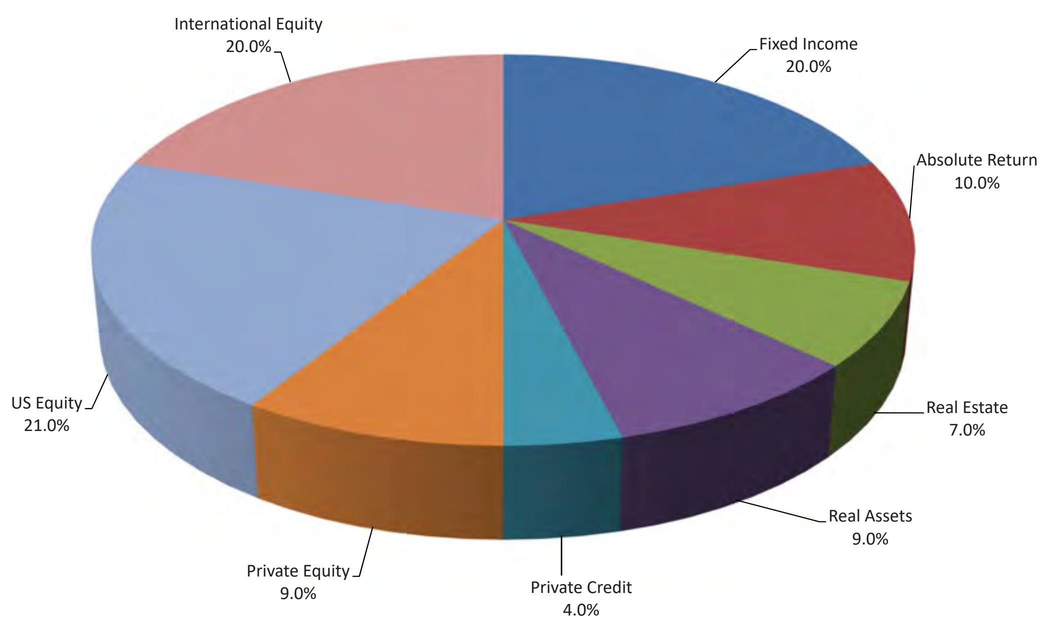
Steve Davis
Chief Investment Officer

ASSET ALLOCATION

Actual Asset Allocation as of June 30, 2018



Target Asset Allocation as of June 30, 2018



The actual asset allocation for real estate was net of $50 million of investment leverage for mortgages payable.

Board of Retirement
Sacramento County Employees' Retirement System
980 9th Street, Suite 1900
Sacramento, CA 95814

Re: Actuarial Valuation for the Sacramento County Employees' Retirement System

Dear Members of the Board:

Segal Consulting (Segal) prepared the June 30, 2018 annual actuarial valuation of the Sacramento County Employees' Retirement System. We certify that the valuation was performed in accordance with generally accepted actuarial principles and practices and SCERS' funding policy that underwent a substantive review by the Board in 2013. In particular, it is our understanding that the assumptions and methods used for funding purposes meet the parameters set by Actuarial Standards of Practice (ASOPs).

As part of the June 30, 2018 actuarial valuation, Segal conducted an examination of all participant data for reasonableness. Summaries of the employee data used in performing the actuarial valuations over the past several years are provided in our valuation report. We did not audit the System's financial statements. For actuarial valuation purposes, Plan assets are valued at Actuarial Value. Under this method, the assets used to determine employer contribution rates take into account market value by recognizing the differences between the total actual investment return at market value and the expected investment return from the prior six years. Deferred gains and losses as of June 30, 2013 have been combined and will be recognized over a six-year period starting July 1, 2013. Investment gains/losses established after July 1, 2013 will be recognized over a seven-year period and the deferred return is further adjusted, if necessary, so that the actuarial value of assets will stay within 30% of the market value of assets.

One of the general goals of an actuarial valuation is to establish contribution rates which, over time, will remain level as a percentage of payroll unless Plan benefit provisions are changed. Actuarial funding is based on the Entry Age Cost Method. Under this method, the employer contribution rate provides for current cost (normal cost) plus a level percentage of payroll to amortize any unfunded actuarial accrued liability (UAAL). The UAAL is amortized over different periods depending on the source.

Board of Retirement
Sacramento County Employees' Retirement System
November 6, 2018
Page 2

The UAAL established as a result of the Early Retirement Incentive Program for members of the Sacramento County Law Enforcement Managers Association (LEMA) is amortized as a level percentage of payroll over a 10-year period beginning June 30, 2010. The System's remaining outstanding balance of the June 30, 2012 UAAL is amortized as a level percentage of payroll over a declining 23-year period (with 17 years remaining as of June 30, 2018). Effective with the June 30, 2013 valuation, the change in UAAL that arises due to actuarial gains or losses or from changes in actuarial assumptions or methods at each valuation is amortized as a level percentage of payroll over its own declining 20-year period. Any change in UAAL that arises due to plan amendments will be amortized as a level percentage of payroll over its own declining 15-year period and any change in UAAL due to retirement incentive programs will be amortized as a level percentage of payroll over its own declining period of up to 5 years. The progress being made towards meeting the funding objective through June 30, 2018 is illustrated in the Schedule of Funding Progress.

Notes number 1, 4 and 5 to the Basic Financial Statements and the Required Supplemental Information (RSI) included in the Financial Section were prepared by the System based on the results of the Governmental Accounting Standards Board Statement 67 (GASBS 67) actuarial valuation as of June 30, 2018 and the Actuarial Valuation and Review as of June 30, 2018, both prepared by Segal. For the Financial Section of the Comprehensive Annual Financial Report (CAFR), Segal provided the Schedule of Changes in Net Pension Liability and Schedule of Employer Contributions as shown in the RSI. A listing of the other supporting schedules Segal prepared for inclusion in the Actuarial and Statistical Sections of the System's CAFR is provided below. These schedules were prepared based on the results of the actuarial valuation as of June 30, 2018 for funding purposes. All other schedules in the Actuarial and Statistical Sections of the System's CAFR were prepared by the System.

1. Retirees and beneficiaries added to and removed from retiree payroll;
2. Solvency test; and
3. Schedule of retiree members by type of benefit.

The valuation assumptions included in the Actuarial Section were adopted by the Retirement Board based on the June 30, 2016 Actuarial Experience Study. It is our opinion that the assumptions used in the June 30, 2018 valuation produce results, which, in the aggregate, anticipate the future experience of the Plan. Actuarial valuations are performed on an annual basis. An experience analysis is performed every three years. The next experience analysis is due to be performed as of June 30, 2019 and assumptions approved in that analysis will be applied in the June 30, 2020 valuation.

In the June 30, 2018 valuation, the ratio of the valuation assets to actuarial accrued liabilities increased from 81.1% to 81.4%. The employer's rate has increased from 28.36% of payroll to 28.80% of payroll <u>before</u> the three-year phase-in of the change in UAAL rate due to changes in actuarial assumptions included in the June 30, 2016 Actuarial Experience Study, while the

Board of Retirement
Sacramento County Employees' Retirement System
November 6, 2018
Page 3

employee's rate has increased from 11.75% of payroll to 11.77% of payroll. The increase in the employer's rate is primarily a result of lower than expected contributions while the increase in the employee's rate is primarily a result of the Rep Units 16 and 25 members agreeing to contribute an additional portion of the Normal Cost in 2019/2020.

Note that the Board adopted a three-year phase-in of the cost impact of the changes in actuarial assumptions calculated in the June 30, 2017 valuation on the employer's UAAL rate only. After reflecting the three-year phase-in, the employer's rate calculated in this valuation is 26.85% of payroll.

In the June 30, 2018 valuation, the actuarial value of assets excluded $128.9 million in deferred investment gains, which represented about 1% of the market value of assets. If these deferred investment gains were recognized immediately in the actuarial value of assets, the funded percentage would increase from 81.4% to 82.5% and the aggregate employer contribution rate (after reflecting the three-year phase-in), expressed as a percent of payroll, would decrease from about 26.9% to 25.9%.

The undersigned are Members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Sincerely,

Paul Angelo, FSA, MAAA, FCA, EA	Andy Yeung, ASA, MAAA, FCA, EA
Senior Vice President and Actuary	Vice President and Actuary

Enclosures

GASB Statement No. 67 rules only redefine pension liability and expense for financial reporting purposes, and do not apply to contribution amounts for pension funding purposes. Employers and plans can still develop and adopt funding policies under current practices. SCERS' Board of Retirement and management staff are responsible for establishing and maintaining the System's funding policy. When measuring the total pension liability, GASB uses the same actuarial cost method (Entry Age Method) and the same type of discount rate (expected return on assets) as SCERS uses for funding. This means that the Normal Cost component of the annual plan cost is determined on the same basis for funding and financial reporting.

The following assumptions and methods were based on the June 30, 2016 actuarial experience study, which was adopted by the Board in May 2017. These assumptions and methods were used to complete the June 30, 2018 actuarial valuation report, and was approved by the Board on November 5, 2018.

Assumptions:

Valuation Interest Rate and Rate of Return on Investments:	7.00% net of administration and investment expenses
Inflation Assumption:	3.00% compounded semi-annually
Cost-of-Living Adjustment:	3.00% for Miscellaneous and Safety Tier 1 Members 0.00% for Miscellaneous Tier 2 Members 2.00% for Miscellaneous Tier 3, Tier 4 and Tier 5 and Safety Tier 2, Tier 3 and Tier 4 Members
Employee Contribution Crediting Rate:	5-year Treasury rate, assuming sufficient net investment earnings
Post-Retirement Mortality:	
a) Service:	For Miscellaneous Members and Beneficiaries - Headcount-Weighted RP-2014 Healthy Annuitant Mortality Table projected generationally with the two-dimensional scale MP-2016 set forward one year for males and no age adjustment for females. For Safety Members - Headcount-Weighted RP-2014 Healthy Annuitant Mortality Table projected generationally with the two-dimensional scale MP-2016 set back four years for males and females.
b) Disability:	For Miscellaneous Members - Headcount-Weighted RP-2014 Healthy Annuitant Mortality Table projected generationally with the two-dimensional scale MP-2016 set forward seven years for males and set forward eight years for females. For Safety Members - Headcount-Weighted RP-2014 Healthy Annuitant Mortality Table projected generationally with the two-dimensional scale MP-2016 set forward four years for males and females.

c) Employee Contribution Rate:	For Miscellaneous Members - Headcount-Weighted RP-2014 Healthy Annuitant Mortality Table projected 20 years with the two-dimensional scale MP-2016 set forward one year for males and no age adjustment for females, weighted 40% male and 60% female. For Safety Members - Headcount-Weighted RP-2014 Healthy Annuitant Mortality Table projected generationally with the two-dimensional scale MP-2016 set back four years for males and females, weighted 75% male and 25% female.
Pre-Retirement Mortality:	Based upon the June 30, 2016 Actuarial Experience Study
Withdrawal Rates:	Based upon the June 30, 2016 Actuarial Experience Study
Disability Rates:	Based upon the June 30, 2016 Actuarial Experience Study
Service Retirement Rates:	Based upon the June 30, 2016 Actuarial Experience Study
Salary Increases:	Merit and longevity increases are based upon the June 30, 2016 Actuarial Experience Study plus 3.00% inflation and across the board salary increases of 0.25% per year.
Actuarial Value of Assets:	The market value of assets less unrecognized returns in each of the last six years. Unrecognized return is equal to the difference between actual and expected returns on a market value basis and is recognized over a seven-year period. The deferred return is further adjusted, if necessary, so that the actuarial value will stay within 30% of the market value of assets. Deferred gains and losses as of June 30, 2013 have been combined and will be recognized in equal amounts over a six-year period starting July 1, 2013.
Valuation Value of Assets:	Actuarial value of assets reduced by the value of non-valuation reserves and designations.
Actuarial Cost Method:	Entry Age Cost Method. Entry Age is the age at the members' hire date. Normal Cost and Actuarial Accrued Liability are calculated on an individual basis and are based on costs allocated as a level percentage of compensation.

Amortization Policy:	The UAAL established as a result of the Early Retirement Incentive Program for LEMA members is amortized over a 10-year period beginning June 30, 2010. The balance of the UAAL as of June 30, 2012 shall be amortized separately from any future changes in UAAL over a period of 23 years as of June 30, 2012. Any new UAAL as a result of actuarial gains or losses identified in the annual valuation as of June 30 will be amortized over a period of 20 years. Any new UAAL as a result of changes in actuarial assumptions or methods will be amortized over a period of 20 years. The change in UAAL as a result of any plan amendments will be amortized over a period of 15 years and the change in UAAL resulting from retirement incentive programs will be amortized over a period of up to 5 years.
Percentage of Members Married at Retirement:	80% for male members and 55% for female members.
Retirement Age for Deferred Vested Members:	Miscellaneous Members - 59 Safety Members - 53
Percentage Eligible for Reciprocal Benefits:	Miscellaneous Members - 35% Safety Members - 45%
Changes in Actuarial Assumptions:	None.

Briefly summarized below are the major provisions of the County Employees' Retirement Law of 1937, as amended through June 30, 2018, that are applicable to the Sacramento County Employees' Retirement System, a cost-sharing multiple-employer defined benefit pension plan.

Membership

Miscellaneous employees entering before September 27, 1981 are Tier 1 members. Miscellaneous employees entering on or after September 27, 1981 and June 27, 1993 are members of Tier 2 or Tier 3, respectively. County Miscellaneous employees entering on or after January 1, 2012 but prior to January 1, 2013 are members of Tier 4. Miscellaneous employees entering on or after January 1, 2013 are members of Tier 5. Safety members entering before June 25, 1995 are Tier 1 members. Safety members entering on or after June 25, 1995 are Tier 2 members. County Safety employees entering on or after January 1, 2012 but prior to January 1, 2013 are members of Tier 3. Safety members entering on or after January 1, 2013 are members of Tier 4.

Final Average Salary

Final average salary (FAS) is defined as the highest 12 consecutive months of compensation earnable for Miscellaneous Tier 1 and Safety Tier 1 and highest 36 consecutive months for Miscellaneous Tier 2, Tier 3, Tier 4 and Tier 5 and Safety Tier 2, Tier 3 and Tier 4.

Return of Contributions

Upon separation from service, a member may elect to leave his or her contributions on deposit. If the member has five or more years of service, he or she may elect to receive a deferred benefit when eligible for retirement. If the member has less than five years of service, he or she may request a return of contributions, plus interest, at any time.

Service Retirement Benefit

Miscellaneous Tier 1, Tier 2, Tier 3 and Tier 4 and Safety Tier 1, Tier 2 and Tier 3 members with 10 years of service who have attained the age of 50 are eligible to retire. All members with 30 years of service (20 years for Safety), regardless of age, are eligible to retire.

Miscellaneous Tier 5 and Safety Tier 4 members with 5 years of service who have attained the age of 52 (age 50 for Safety) are eligible to retire.

The benefit expressed as a percentage of monthly FAS per year of service, depending on age at retirement, is illustrated below for typical ages. For members whose benefits are integrated with Social Security, the benefit is reduced by one-third of the percentage shown below times the first $350 of monthly FAS per year of service after January 1, 1956.

Age	Miscellaneous Tier 1, 2 and 3	Miscellaneous Tier 4	Miscellaneous Tier 5	Safety Tier 1 and 2	Safety Tier 3	Safety Tier 4
50	1.48%	1.18%	N/A	3.00%	2.29%	2.00%
55	1.95	1.49	1.30%	3.00	3.00	2.50
60	2.44	1.92	1.80	3.00	3.00	2.70
62	2.61	2.09	2.00	3.00	3.00	2.70
65	2.61	2.43	2.30	3.00	3.00	2.70
67 and over	2.61	2.43	2.50	3.00	3.00	2.70

Disability Benefit

Members with five years of service, regardless of age, are eligible for nonservice-connected disability.

For Miscellaneous Tier 1 members, the benefit is 1.5% (1.8% for Safety Tier 1 members) of FAS for each year of service. If this benefit does not equal one-third of FAS, the benefit is increased by the same percentage of FAS for the years which would have been credited to age 65 (age 55 for Safety members), but the total benefit in this case cannot be more than one-third of FAS.

For Tier 2, Tier 3, Tier 4 and Tier 5 members, the benefit is 20% of FAS for the first five years of service plus 2% for each additional year for a maximum of 40% of FAS.

If the disability is service connected, the member may retire regardless of length of service, with a benefit of 50% of FAS or 100% Service Retirement benefit, if greater.

Death Benefit (Before Retirement)

In addition to the return of contributions, a death benefit is payable to the member's beneficiary or estate equal to one month's salary for each completed year of service under the retirement system, based on the final year's average salary, but not to exceed six (6) month's salary.

If a member dies while eligible for service retirement or nonservice-connected disability, the spouse receives 60% of the allowance that the member would have received for retirement.

If a member dies in the performance of duty, the spouse or minor child receives 50% of the member's final average salary or 100% of Service Retirement benefit, if greater.

Death Benefit (After Retirement)

If a member dies after retirement, a $4,000 lump sum burial allowance is paid to the beneficiary or estate. If the retirement was for service-connected disability, 100% of the member's allowance as it was at death is continued to the eligible spouse for life.

If the retirement was for other than service-connected disability and the member elected the unmodified option, 60% of the member's allowance is continued to an eligible spouse for life.

An eligible spouse is a surviving spouse who was married to the member at least one year prior to the date of retirement.

Maximum Benefit

The maximum benefit payable to a member or beneficiary is 100% of FAS for Miscellaneous Tier 1, Tier 2, Tier 3 and Tier 4 and Safety Tier 1, Tier 2 and Tier 3. There is no maximum benefit for Miscellaneous Tier 5 and Safety Tier 4 members.

Cost-of-Living Adjustments

The maximum increase in retirement allowance is 4% per year for Miscellaneous Tier 1 and Safety Tier 1 members and 2% for Safety Tier 2, Tier 3 and Tier 4, and Miscellaneous Tier 3, Tier 4 and Tier 5 members.

Miscellaneous Tier 2 members have no cost-of-living benefit. The cost-of-living increases effective in the month of April are based on the average annual change in the Consumer Price Index for the calendar year preceding April.

Contribution Rates

Basic member contribution rates are based on the age-nearest birthday at entry into the System (single rate for entrants after January 1, 1975). The rates are designed to provide an average annuity at age 55 equal to 1/240 of FAS for Miscellaneous Tier 1, 2 and 3 members, at age 60 equal to 1/120 of FAS for Miscellaneous Tier 4 members and 1/100 of FAS at age 50 for Safety Tier 1, Tier 2 and Tier 3 members. For Miscellaneous Tier 5 and Safety Tier 4 members, the rates are 50% of the Normal Cost rate. For members integrated with Social Security, the above contributions are reduced by one-third of that portion of such contribution payable with respect to the first $350 of monthly salary. Cost-of-living contribution rates are designed to pay for one-half of the future cost-of-living costs. Member contributions are refundable upon termination from the system.

SCHEDULE OF ACTIVE MEMBER VALUATION DATA

Valuation Date	Plan Type	Number	Annual Payroll (in thousands)	Annual Average Pay (in thousands)	% Increase/ (decrease) in Average Pay*
6/30/2018	Miscellaneous	10,586	$780,148	$73.7	2.24%

Events affecting year to year comparability:

6/30/10 - Investment return assumption decreased from 7.875% to 7.75%.

6/30/11 - Modification in non-economic assumptions.

6/30/12 - Investment return assumption decreased from 7.75% to 7.50%;
- Inflation assumption decreased from 3.50% to 3.25%;
- Salary increase assumption decreased from 5.65% to 5.40%;
- COLA increase assumption for Tier 1 decrease from 3.40% to 3.25%.

6/30/13 - Actuarial cost method changed from Aggregate Entry Age Normal Cost Method to Individual Entry Age Normal Cost Method.
- Changes to the amortization periods used for various future changes in liability:
  - UAAL established as a result of Early Retirement Incentive Program for LEMA is amortized over a 10-year period beginning June 30, 2010;
  - UAAL as a result of actuarial gains or losses as of June 30 will be amortized over a 20-year period;
  - UAAL as a result of changes in actuarial assumptions or methods to be amortized over a 20-year period;
  - Change in UAAL as a result of plan amendments to be amortized over a 15-year period; and
  - UAAL as a result from retirement incentive programs will be amortized over a period up to 5 years.

6/30/14 - Changes to post-retirement mortality rates and termination rates before retirement.
- Changes to retirement age and benefit for deferred vested members.
- Changes to annual rates of compensation increase.

6/30/17 - Investment return assumption decreased from 7.50% to 7.00%;
- Inflation assumption decreased from 3.25% to 3.00%;
- COLA increase assumption for Tier 1 decrease from 3.25% to 3.00%;
- Modification in non-economic assumptions.

* The June 30, 2010 results have been revised to reflect the correct actuarial accrued liability, which was overstated in the June 30, 2010 valuation.

SECTION 5
STATISTICAL

SUMMARY OF STATISTICAL DATA

Issued in May 2004, pronouncement GASB Statement No. 44, *Economic Conditioning Reporting: The Statistical Section,* establishes and modifies requirements related to the supplementary information presented in this section of the report.

The pension trust fund is accounted for under the accrual basis of accounting. Information is provided for the last ten years ended June 30, 2018 for the following five objectives: financial trends; revenue capacity; debt capacity; demographic and economic; and operating.

Financial trends are presented on pages 129 to 133. The schedules contain trend information to aid in understanding how the System's financial performance has changed over time.

Revenue capacity is presented on pages 129, 131, and 132. The schedules contain information regarding the contribution amount and rate history for the last ten years.

Demographic and economic information is presented on pages 134 to 138. These schedules offer demographic and economic indicators to enhance understanding of the environment within which the System's financial activities take place. The schedules show the average monthly benefit payments followed by the System membership.

Operating information is presented on pages 139 and 140. These schedules contain pension plan data to assist in understanding how the information in the financial report relates to the pension plan the System administers. This section includes the schedules of principal participating employers and active members.

Source: Actuarial Valuation reports from June 30, 2009 through 2018

Note: Actuarial Valuations are prepared subsequent to fiscal year-end and determine rates which pertain to the following fiscal year. For example, the Actuarial Valuation as of June 30, 2018 is used to determine rates for the fiscal year 2019-20.

* Effective for the June 30, 2012 Actuarial Valuation, County includes County elected officials (Board of Supervisors, Sheriff, District Attorney and Assessor).

** Effective July 1, 2014, subsequent to the completion of the actuarial valuation for the year ended June 30, 2013, the County and several bargaining groups entered into an agreement for members to pick up an additional portion of the total normal cost in fiscal year 2014-15. The County employer contribution rates shown have not been adjusted to reflect the members agreeing to pick up an additional portion of the normal cost.

*** Miscellaneous Tier 5 and Safety Tier 4 plans were established effective January 1, 2013.

**** Miscellaneous Tier 4 and Safety Tier 3 plans were established effective January 1, 2012.

***** Contribution rates for Safety members were revised to adjust for the overstatement of the unfunded actuarial accrued liability (UAAL) contribution rate in the June 30, 2010 valuation.

16 Beneficiary of Non-Member
17 Beneficiary of Divorce-Receiving

Source: SCERS Retired Member Pension Payroll Data

**** Option Selected:**
Unmodified:
Qualified service retirement or nonservice-connected disability retirement beneficiary receives 60 percent continuance. Qualified service-connected disability retirement beneficiary receives 100 percent continuance.

The following options reduce the retired member's monthly benefit:
Option 1 - Beneficiary receives lump sum or member's unused contributions.
Option 2 - Beneficiary having an insurable interest in member's life receives 100 percent of member's reduced monthly benefit.
Option 3 - Beneficiary having an insurable interest in member's life receives 50 percent of member's reduced monthly benefit.
Option 4 - Benefits paid to person having an insurable interest in member's life as nominated by member's written designation.
